1

School Data: Ofsted (All Schools)

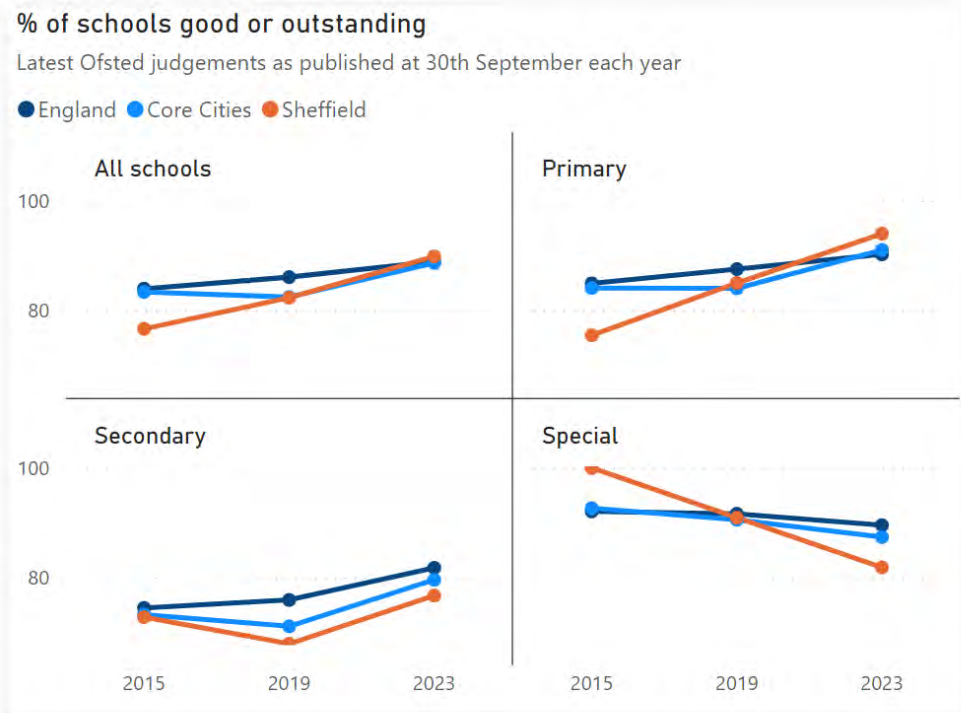

% of ALL schools good or outstanding				
Area	30/09/20	30/09/21	30/09/22	30/09/23
Core cities	84.6	84.8	87.2	89.0
National	86.3	86.5	88.1	88.9
Sheffield	85.7	85.7	88.6	89.8
Stat. neighbours	82.3	82.7	84.9	86.0

- Sheffield finished the 2021/22 school year above national (for the % of all schools good or outstanding) for the first time (+0.5% points above national and +1.4% points above Core Cities).
- The 2022/23 year-end position (30 September 2023) is a further improvement on 2021/22 – Sheffield 89.8% (0.9% points above national).
- For context, Sheffield was 9.8% points below national in September 2015.

1

Ofsted judgements - % of schools good or outstanding

- In September 2023, Sheffield ranked 2nd out of 8 Core Cities and 73rd nationally out of 153 LAs for the proportion of schools judged good or outstanding. The national ranking is in the 2nd quartile and significantly outperforms Sheffield's ranking for deprivation.
- The primary sector ranks in the top half of both Core Cities and national, whilst secondary and special are in the 3rd quartile nationally and the bottom half of Core Cities.

% good or outstanding and difference c/w Sheffield (as at 30th Sept)

area	Sheffield % of schools	diff w. national	diff w. Core Cities
2015			
All schools	76.6	-7.3	-6.7
Primary	75.4	-9.5	-8.6
Secondary	72.7	-1.7	-0.5
Special	100.0	8.0	7.4
2019			
All schools	82.3	-3.8	-0.1
Primary	85.0	-2.5	1.0
Secondary	67.9	-8.0	-3.2
Special	90.9	-0.7	0.4
2023			
All schools	89.8	0.9	1.2

Secondary	108	7
Special	102	5
2023		
All schools	73	2
Primary	53	3
Secondary	108	6
Special	112	7

Note: the methodology for reporting Ofsted inspections changed between 2015 and 2019. Data from 2019 onwards includes latest judgements for all schools that have ever received an inspection including academy converters. Previous data excluded judgements for schools that converted to sponsor led academies following an inspection. The 2015 figures for % of schools judged good or outstanding would be lower than reported if all school judgements had been recorded.

1

Ofsted judgements - % of pupils in good or outstanding schools

- 88% of all pupils and 94.5% of primary age pupils attended a good or outstanding school as of 30 September 2023.
- The % of all pupils in a good or outstanding schools is slightly below the national average but slightly above the Core Cities average.
- In secondary and special the % of pupils in a good or outstanding school is below the national and below Core Cities average.

% pupils in good or outstanding schools and difference c/w Sheffield (as at 30th September)

area	year	Sheffield % of pupils	diff w. national	diff w. Core Cities

Note: the methodology for reporting Ofsted inspections changed between 2015 and 2019. Data from 2019 onwards includes latest judgements for all schools that have ever received an inspection including academy converters. Previous data excluded judgements for schools that converted to sponsor led academies following an inspection. The 2015 figures for % of pupils in schools judged good or outstanding would be lower than reported if all school judgements had been recorded.

1

School Data: Ofsted (Primary)

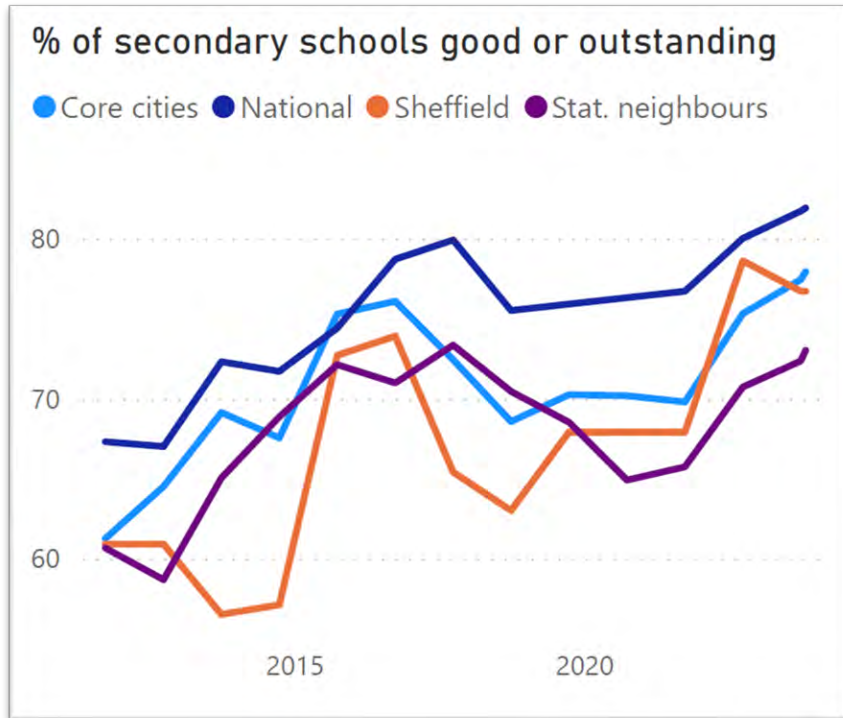

% of primary schools good or outstanding

Area	30/09/20	30/09/21	30/09/22	30/09/23
Core cities	87.0	87.3	90.1	91.9
National	87.8	87.9	89.5	90.2
Sheffield	89.5	89.5	91.7	94.0
Stat. neighbours	85.0	85.3	87.1	88.6

- At year-end (30 September 2023) 94% of all Sheffield primaries were judged good or outstanding.
- This showed an improvement during the academic year 2022/23 of 2.3% points, following an increase of 2.2% points in 2021/22.
- This placed Sheffield primary schools 3.8% points above primary schools nationally and 2.1% points above Core Cities.

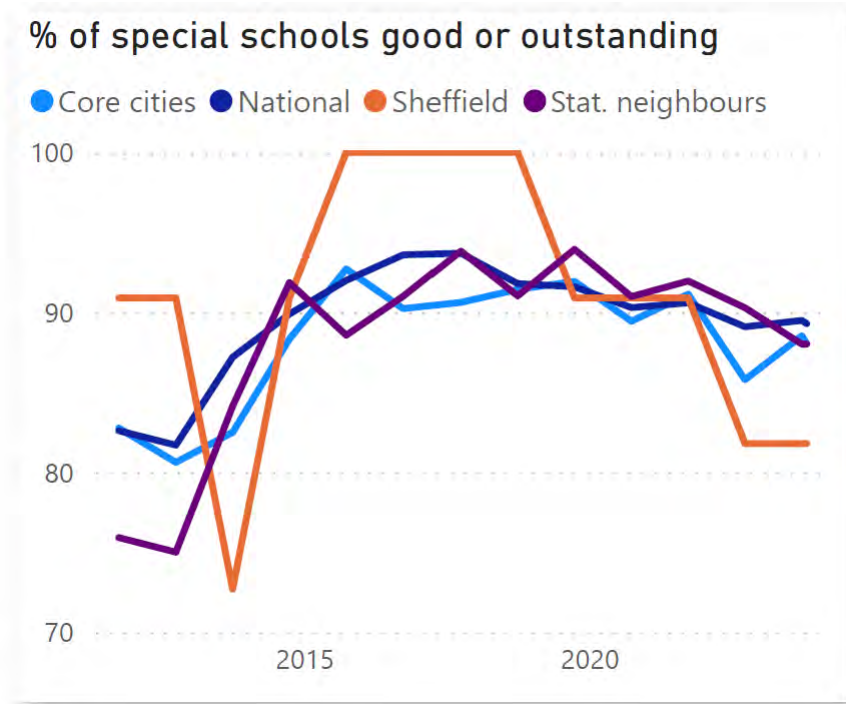

1 School Data: Ofsted (Secondary)

Area	30/09/20	30/09/21	30/09/22	30/09/23
Core cities	70.2	69.8	75.3	77.4
National	76.3	76.7	80.0	81.7
Sheffield	67.9	67.9	78.6	76.7
Stat. neighbours	64.9	65.7	70.7	72.3

- In the secondary sector at the end of the academic year 2022/23, 76.7% of schools were judged good or outstanding.
- This is a slight decline (down 1.9% points) from 2022/23 weakening our relative position as Core City and national performance has improved.
- This placed Sheffield secondary schools 5.0% points below national and 0.7% points below Core Cities.

1 School Data: Ofsted (Special)

% of special schools good or outstanding

Area	30/09/20	30/09/21	30/09/22	30/09/23
Core cities	89.5	91.1	85.8	88.5
National	90.3	90.6	89.1	89.5
Sheffield	90.9	90.9	81.8	81.8
Stat. neighbours	91.0	92.0	90.3	88.0

- As there are only 11 settings in the special school data with inspection judgements (two new schools had not been inspected as at 30 September 2023) one school has a significant impact on Sheffield’s overall position.
- Sheffield was below the national average and Core Cities average at the end of the 2022/23 school year - either of the two schools below good moving to good or outstanding would move Sheffield above the national average).

Outcomes for children and young people

- In 2015, 53k of 71k* pupils attended a school judged good or outstanding. By 2023, 74k of 84k* pupils attended a school judged good or outstanding.
- The percentage of Sheffield pupils attending a school judged good or outstanding increased from 75% in 2015 to 88% in 2023.
- Over the past 8 years, an additional 21k pupils attend a good or outstanding setting - a 13% point increase in the percentage of pupils attending a good or outstanding setting.
- In September 2023, 10,132 pupils attended a setting which is not judged currently to be good or outstanding.

Trails for further investigation

- **1.1** Setting inspection outcomes in the Sheffield primary phase are above national, whilst pupil outcomes are below national. What causes this disparity and what, if any, are the implications of this?

Total	72995	74027	74833	75831	76535	76673	77620	78991

2

Pupil characteristics – pupil numbers by setting

- Sheffield has a lower % of young people in special schools compared to the national average and Core Cities average but a higher % of young people in special schools in the secondary phase.
- The independent sector in Sheffield is significantly smaller than the national and Core Cities average (3% of pupils in Sheffield compared to 6.5% nationally in 2023).
- The % of pupils in state-funded alternative provision is slightly higher than the Core Cities average. As this is a snapshot on Census day the % of young people who spend any time in alternative provision will be higher as this is often for short period of time before reintegration into another setting.

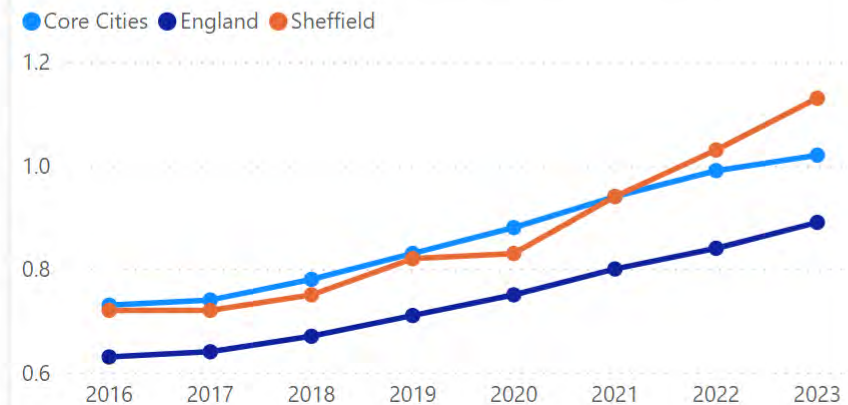

% of young people in state-funded special schools (primary phase)

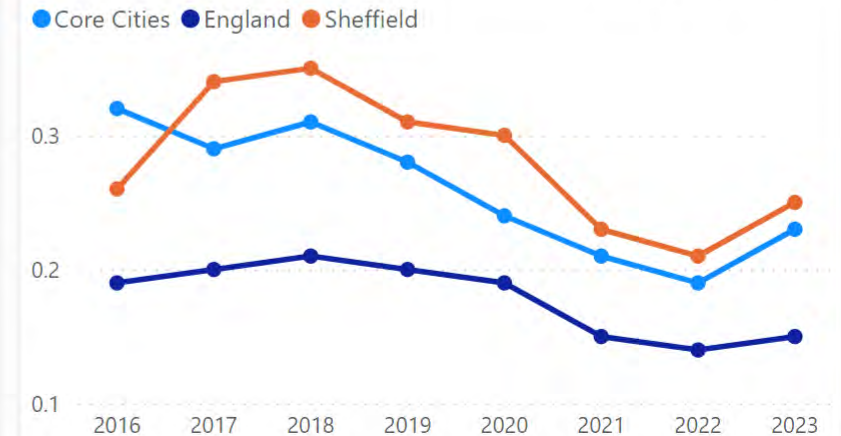

% of young people in independent schools

% of young people in state-funded special schools (secondary phase)

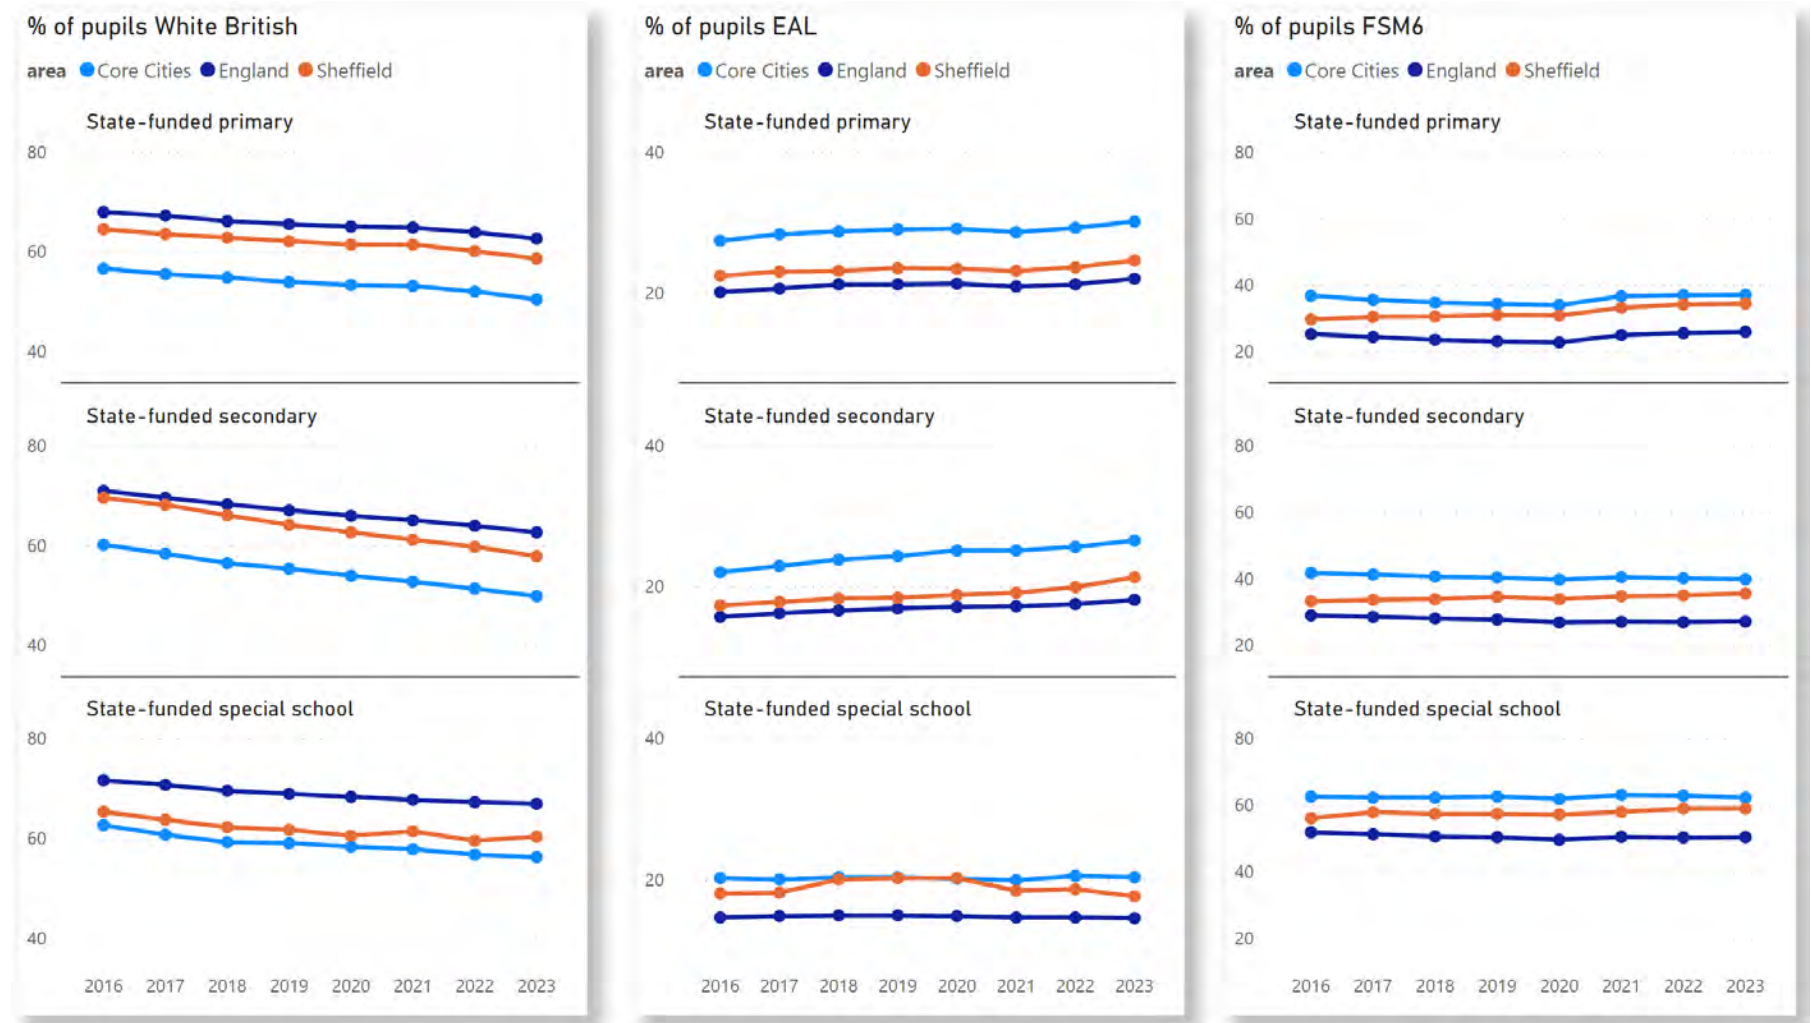

% of young people in state-funded alternative provision

2

Pupil characteristics – trends by phase

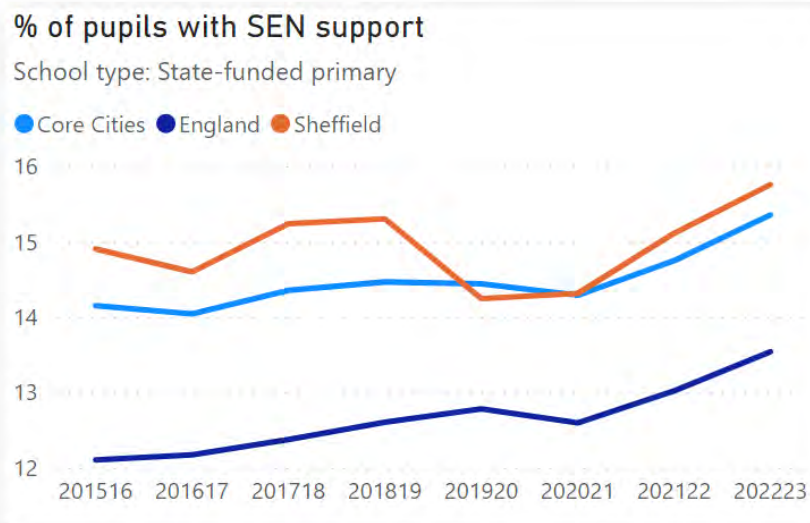

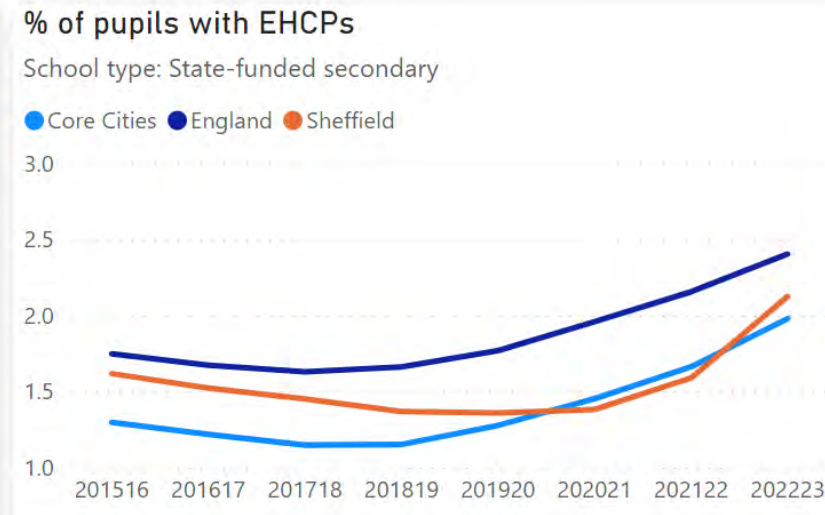

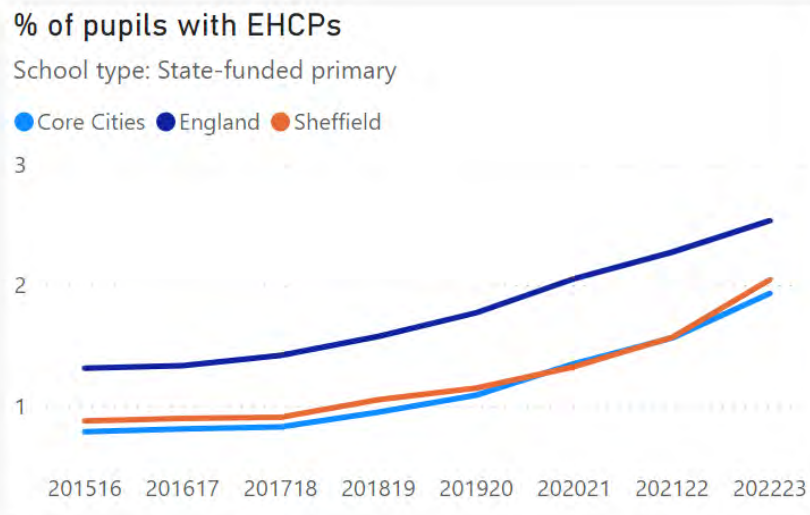

- Sheffield has a higher % of pupils from black and minority ethnic groups, a higher % of pupils with English as an additional language and a higher % of pupils eligible for the pupil premium compared to the national average. The % of pupils in these categories has been rising since 2016.
- Although Sheffield is above the national average on the above measures it is below the average for Core Cities.
- The % of pupils eligible for pupil premium has been increasing steadily and Sheffield is now ~ 3% points below the Core Cities average compared to around 7% points below in 2016.

2

Pupil characteristics – % of pupils with SEND

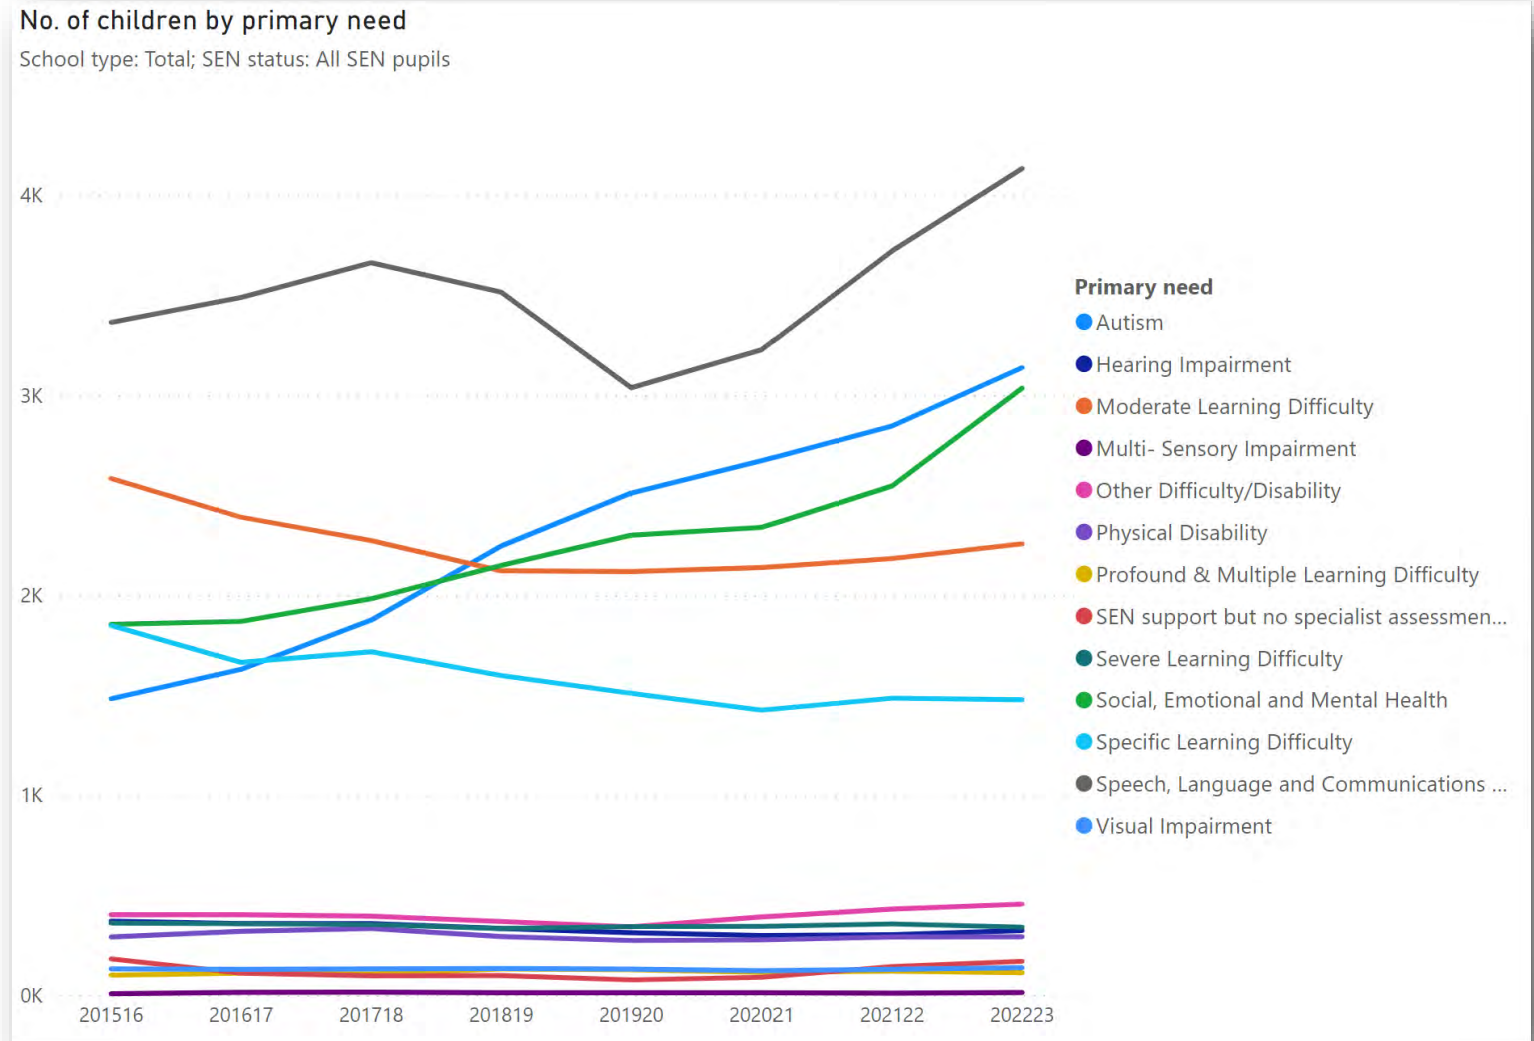

- In 2023, 2% of pupils in primary schools and 2.1% of pupils in secondary schools had an Education, Health & Care Plan (EHCP).
- The % of pupils with EHCPs in Sheffield in January 2023 is below the national average and slightly above the Core Cities average.
- A further 15.8% of pupils in primary and 13.6% of pupils in secondary had a SEN support plan. These figures are higher than the national average.

2

Pupil characteristics – SEND primary needs

- The most prevalent need for pupils with SEND in Sheffield is speech, language and communication followed by autism and social, emotional and mental health.
- 4.9% of pupils in all state-funded settings have a primary need of speech, language and communication, this is higher than the national average (4.1%) and the Core Cities average (4.7%).
- The % of pupils with autism is also significantly higher than the national average (3.7% in Sheffield compared to 2.4% nationally).

2

Pupil characteristics – primary - ethnicity & EAL

- Sheffield has a higher % of pupils of Pakistani, Black African, White Gypsy/Roma and any other ethnic group in comparison to the national average. The % of pupils of White Gypsy/Roma ethnicity is higher than the national average and the Core Cities average.
- Overall pupil numbers in primary have decreased slightly since 2019. The largest % increase has been for pupils of Indian origin (87%); there has also been a 32% increase in Black African pupils. The White British population has declined by 6% since 2019.
- There has been a 4% increase in the number of primary-age pupils with EAL compared to a 2% decrease in the number of pupils with English as a first language.

2

Pupil characteristics – primary – pupil premium (2023)

- The % of pupils eligible for the pupil premium in Sheffield primary schools is higher than the national average for the majority of ethnic groups. Eligibility rates are also higher within BAME groups compared to White British children.
- 29% of White British pupils are eligible for the pupil premium in Sheffield which is 8% points lower than the Core Cities average.
- Pupil premium eligibility is higher in the younger age groups. This may mean increasing overall eligibility for pupil premium in the future with Sheffield moving more in line with the average for Core Cities.

2

Pupil characteristics – secondary - ethnicity & EAL

- Similar to primary, Sheffield has a higher % of pupils of Pakistani, Black African, White Gypsy/Roma and any other ethnic group in comparison to the national average. The % of pupils of White Gypsy/Roma ethnicity is higher than the national average and the Core Cities average.
- Overall pupil numbers in secondary have increased 11% since 2019. The largest % increase is for Indian, pupils with unknown ethnicity, any other Mixed background, Black African, White & Black African, any other Asian background, and any other White background. The number of children in these groups has increased by more than 40% since 2019.
- There has been a 28% increase in the number of secondary-age pupils with EAL compared to a 7% increase in the number of pupils with English as a first language.

2

Pupil characteristics – special - ethnicity & EAL

- Pupils from BAME groups are slightly under-represented in special schools. In Sheffield 40% of pupils in special schools are BAME compared to 42% in mainstream primary and secondary combined.
- Overall, the special school population has increased by 31% since 2019, which is significantly higher than the overall increase in pupil numbers in mainstream schools.
- In contrast to mainstream, the % increase in the number of pupils with English as a first language (35%) is higher than that for EAL pupils (14% increase).

Pupil characteristics – special – pupil premium

- The % of pupils eligible for the pupil premium is significantly higher in special schools (59% compared to ~35% in mainstream). However, the difference between Sheffield and the national average is similar in mainstream and special.
- Pupil premium eligibility rates are not higher in the special sector across all ethnic groups. For example, eligibility rates are more than double for White British pupils (compared to mainstream) but very only around 5% points higher for Pakistani pupils.

Outcomes for children and young people

- There are ~79k young people from reception to year 11 in Sheffield schools. This is an overall increase of around 6,000 since 2016, most of the increase in pupil numbers is in the secondary phase. Although the overall numbers are smaller, the number of pupils in special schools has increased by 55% since 2016 representing an additional 500 pupils in special schools.
- The number of young people eligible for the pupil premium has increased by around 5,000 since 2016 and this increase has been seen in all phases.
- The number of young people with an EHCP has increased by around 1,400 (71%) since 2016.
- The number of young people with special educational needs with a primary need of autism has more than doubled since 2016. Autism has risen from the 5th to 2nd most prevalent primary need in Sheffield.

Trails for further investigation

- **2.1** Do the differences in the proportions of young people eligible for pupil premium between Sheffield and other Core Cities reflect differences in need, identification or school choices?
- **2.2** How have children's special educational needs changed, why have they changed and how can we use our insights to support improvements in children's experience and outcomes?
- **2.3** What does further analysis of aggregated pupil need tell us about the support needed by schools and localities?

Last updated: October 2023

Next updates: March 2024 (year-end 2022/23)

3

Attendance – overall absence by phase – autumn & spring terms 22/23

- Levels of absence across all phases have increased significantly since 2020/21.
- Comparing the first two terms of 2019/20 and 2022/23, overall absence increased ~2% points in primary and ~4% points in secondary and special.
- Absence in Sheffield is in-line with the Core Cities average in primary and secondary and higher than the Core Cities (and national) average in special schools.

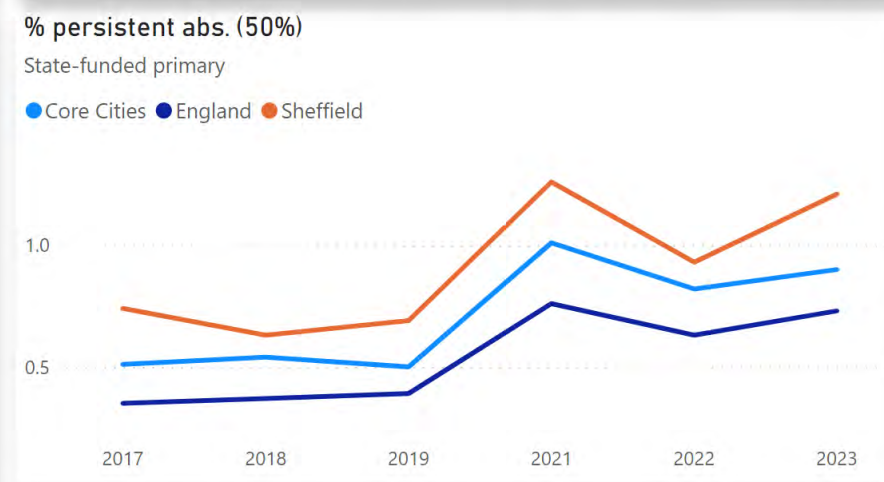

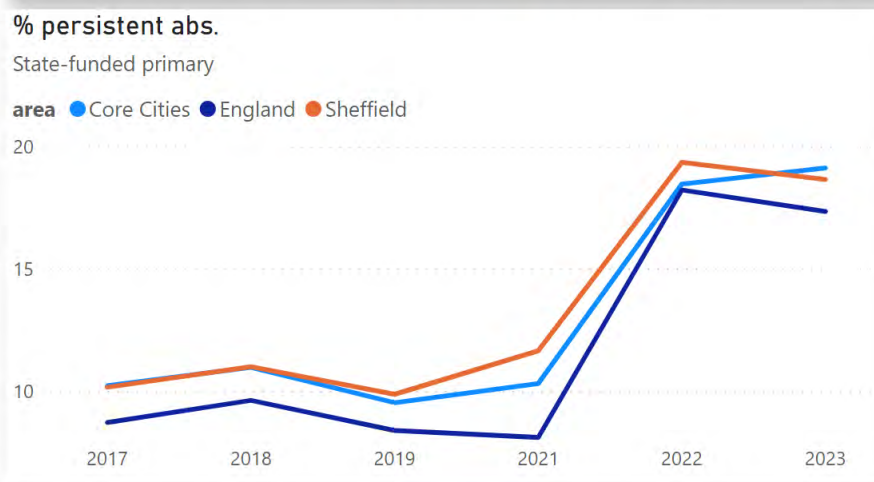

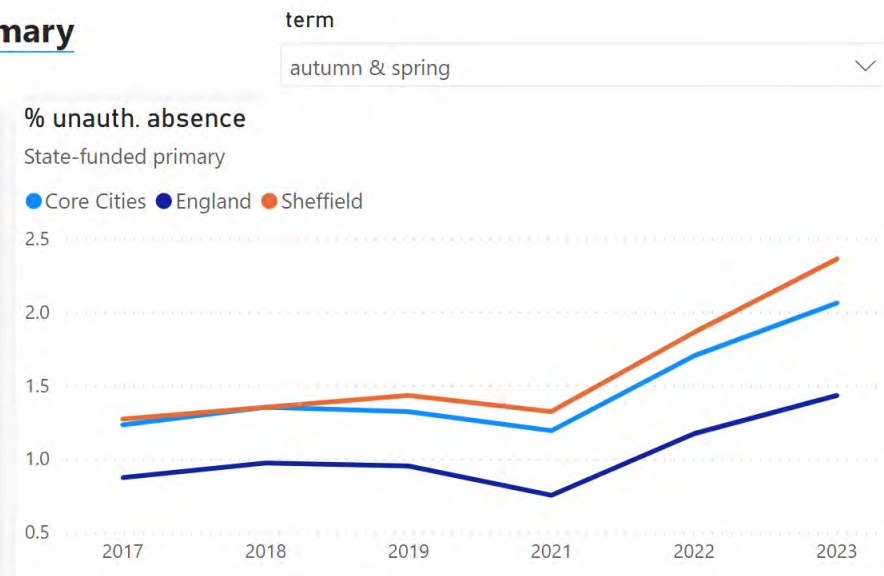

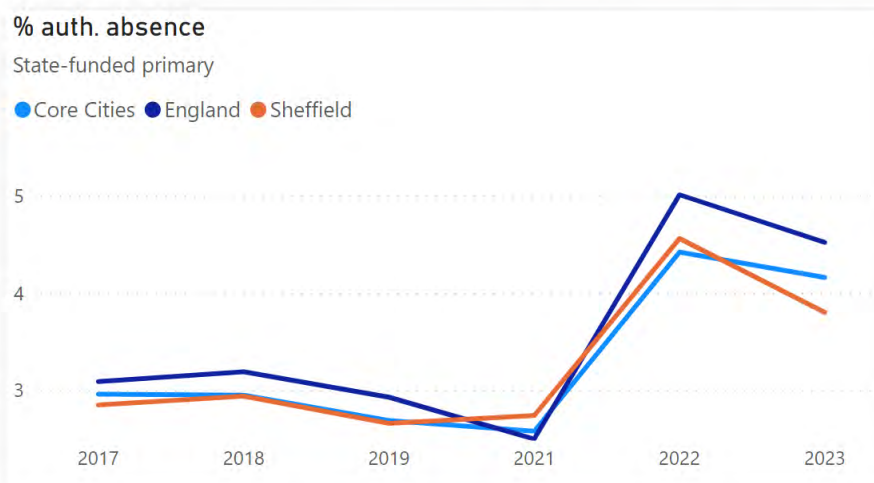

Note: the secondary phase includes primary age pupils in through schools (around 2.5% of all primary age pupils in Sheffield)

Absence and persistent absence (primary)

- Although overall absence in Sheffield is above the national average, authorised absence is lower.
- In contrast, unauthorised absence in Sheffield primary schools was amongst the highest nationally (ranking 146/151 in 2022/23). The gap with national is getting wider.
- Persistent absence improved slightly between 2021/22 and 2022/23 to 18.6% but there was an increase in the % of pupils with below 50% attendance.

Attendance trends - autumn & spring, State-funded primary

Note: primary age pupils in through schools are not included in these figures (around 2.5% of all primary age pupils in Sheffield)

3

Absence and persistent absence (secondary)

- Similar to the primary phase, authorised absence in secondary schools is much lower than the national average and unauthorised absence is higher.
- Unauthorised absence in Sheffield secondary schools was amongst the highest nationally (ranking 147/151). The gap with national is getting wider.
- Secondary schools in Sheffield had the 2nd lowest rate of authorised absence in autumn 2022/23 nearly 2 % points below the national average.
- Persistent absence increased slightly to 26.6% and 4.2% of pupils had attendance below 50%.

3

Absence and persistent absence (special)

- Absence in Sheffield special schools was amongst the 10 highest LAs nationally in the first two terms of 2022/23.
- In contrast to mainstream schools, special schools have relatively lower rates of unauthorised absence – above the national average but below Core Cities (2nd lowest of all Core Cities).
- Persistent absence (% of pupils with attendance below 90%) is very high at 44.6% and nearly 13% of pupils are attending less than 50% of sessions – more than double the national average.

Absence national ranks – autumn & spring terms

- Although attendance has worsened, Sheffield's relative rank compared to other LAs has improved since 2019 for primary and secondary schools (average rank is 106 in primary and 110 in secondary).
- The relative position of special schools in Sheffield has worsened since 2019. The latest average rank for special schools is 136/151.

Reasons for absence – autumn & spring 2023

- The table shows the % of sessions by reason for absence (authorised and unauthorised) and the difference between Sheffield and the national average.
- In the primary and secondary phases Sheffield has a lower % of absences coded as illness compared to the national average (and the difference with national is similar to the difference in authorised absence).
- This may suggest more robust attendance coding in Sheffield as unexplained absence is being coded as unauthorised rather than illness.

Absence by pupil group – special – autumn & spring 2023

- Absence in special schools is lower in the primary phase than in secondary and is lower than the national average and Core Cities in some year groups. Absence is particularly high for Y10 & Y11.
- Similar to mainstream schools, absence is lower for pupils who are not eligible for FSM and the gap with national is smaller.

Outcomes for children and young people

- In the autumn and spring term of 2022/23, ~660,000 school days were missed by young people in Sheffield and ~16,600 young people missed at least one day of school every fortnight.
- For vulnerable pupils, attendance rates are even lower. 13% of young people in special schools are attending less than half the time and 38% of young people eligible for free school meals are missing at least one day per fortnight.
- The attendance of around 1,100 young people would need to improve to above 90% to bring persistent absence rates in Sheffield in line with national but this would still mean that over a fifth of young people were missing at least one day a fortnight.

Trails for further investigation

- **3.1** What does further analysis of the characteristics of young people with attendance below 50% and below 90% suggest about the root causes of Sheffield's attendance challenges?
- **3.2** Does the bottom quartile attendance in Sheffield special schools reflect the nature of provision and cohort or attendance practice?
- **3.3** Do the extreme rankings of authorised and unauthorised absence reflect good practice and what do the strongest outcomes (relative to context) tell us about what works?

4

Exclusions & suspensions – overview by phase

- Latest year-end published data (21/22) shows that Sheffield is well above the national average for suspensions. The permanent exclusion rate is also higher in the primary and secondary phases.
- Sheffield also had a higher rate of suspensions in primary and a higher rate of permanent exclusions in secondary compared to the Core Cities average.
- The suspension rate in special and secondary is higher than it has ever been since 2015.

4 Exclusions – national ranks

- Overall Sheffield's national ranks for exclusions and suspensions has improved slightly in primary and secondary since 2016 but worsened in special. Overall ranking for special are still better than mainstream.

Exclusions – suspensions by pupil group (2021/22)

- There is significant variation in the suspension rate (no. of suspensions / no. of pupils) between pupil groups but, in most cases, the rate in Sheffield is higher than the national and Core Cities rate for the same group.
- Suspension rates are generally higher for particular ethnic groups (Gypsy Roma, White & Black Caribbean, Black Caribbean and White & Asian), pupils eligible for free school meals and pupils with SEN. Suspension rates are also significantly higher in the secondary phase, peaking in Y8 in 2021/22.

FSM - Not eligible	57582	5.76	1.50	0.34

4

Exclusions – permanent exclusions by pupil group (2021/22)

- Pupil groups with high rates of suspensions also tend to have high rates of permanent exclusion.
- White British pupils had a lower rate of permanent exclusion than the national and Core Cities average, in contrast to a number of BAME groups.
- The permanent exclusion rate is higher for pupils eligible for FSM and pupils with SEN without a statement. The permanent exclusion rate for pupils with an EHCP is lower, largely due to a policy of avoiding exclusion for this group.
- Similar to suspensions, the permanent exclusion rate is significantly higher in secondary (peaking in Y10).

Outcomes for children and young people

- In 2021/22 around 3,300 young people in Sheffield were suspended from school on one or more occasion.
- Young people who were eligible for free school meals and young people with special education needs were over three times more likely to be suspended compared to young people without these characteristics.
- 92 young people were permanently excluded from school in 2021/22. This represents 27 more young people than the national average for permanent exclusion.

Trails for further investigation

- **4.1** Would further analysis of the patterns of suspension and permanent exclusion (including reasons for exclusion) for young people by pupil characteristics (including ethnicity) support the development of policy and practice?
- **4.2** What does further analysis of outcomes and destinations for young people who have been suspended or permanently excluded tell us about effective practice and the impact on life chances?

Next updates: February 2024 (final KS4 & KS5) & 2024 data October-December 2024

5

Early Years Foundation Stage – attainment trends

- 64.9% of children in Sheffield in 2023 achieved a good level of development compared to 67.2% nationally.
- Although performance improved for the headline measures at EYFS between 2022 and 2023, the gap between Sheffield and national widened.
- Sheffield is still above the Core Cities average but the gap between Sheffield and Core Cities has narrowed.

Note: the EYFS framework was revised in 2022 so results prior to 2022 are not directly comparable to results from 2022 onwards.

5

Early Years Foundation Stage – national and Core Cities ranks

- Sheffield’s national rank across the EYFS headline measures has worsened over time. In 2023, Sheffield was ranked in the bottom quartile for the % of children achieving a good level of development.
- The relative performance of girls in Sheffield was worse than boys in 2023 (girls had an overall rank of 125 compared to 108 for boys).
- Sheffield has been within the top 3 Core Cities for performance at Foundation Stage since 2016. In 2023, Sheffield moved from 2nd to 3rd place for the % achieving a good level of development.

5

Early Years Foundation Stage – ranks by area of learning

- Sheffield's rank worsened across nearly all individual Early Learning Goals (word reading was the exception).
- There are differences in rank across the different areas of learning with communication & language and expressive arts and design ELGs generally in the 2nd quartile and literacy and maths towards the lower end of the 3rd quartile.

5 Early Years Foundation Stage – pupil groups, % achieving a good level of development (2023)

- The tables show the % of pupils achieving a good level of development (GLD) by pupil group and the difference between Sheffield and the national average.
- Children from BAME groups and children with EAL (with the exception of Chinese children) are less likely to achieve GLD than White British children and children without EAL.
- The gap with national is also larger for BAME, EAL and FSM children.
- Children without EAL and without FSM do better than the national average for these groups.
- Although performance in Sheffield is generally better than Core Cities, for children with EAL performance is 4.6% points lower in Sheffield compared to the Core Cities average.

Phonics & Key Stage 1 – attainment trends

Key Stage 1 % achieving the expected level

Key Stage 1 % achieving the higher level

- At KS1 performance across 7/9 measures improved between 2022 and 2023; however, all measures are lower than they have been in any year since 2016.
- Gaps with national and Core Cities have worsened for 7/9 measures compared to 2016. The average gap is now 3.3% points.
- Sheffield performed better than Core Cities for the majority of indicators prior to 2020 but more than half were below in 2023.

5

Phonics & Key Stage 1 – attainment gaps

- The average % point gap between Sheffield and national in 2023 for Key Stage 1 indicators is 3.3% points. The gap is wider for girls than boys.
- The average gap has more than doubled since 2016 when it was 1.4% points.

2023 change in KS1 gaps with Core Cities compared to previous years

5 Phonics & Key Stage 1 – national ranks

- Sheffield's national rankings have generally worsened since 2016. The average rank is now 130 (125 for boys and 135 for girls) with all but one indicator in the lowest quartile. Ranking has improved slightly for Y1 and Y2 phonics since 2016.

Key Stage 1 ranks and rank change (all pupils - all LAs)

5 Phonics & Key Stage 1 – Core Cities ranks

- Sheffield's position amongst Core Cities has also worsened. Sheffield was the 3rd Core City (on average across all KS1 measures) in 2016 and has now moved to 5th place.

Key Stage 1 ranks and rank change (all pupils - Core Cities)

year measure	2016		2017		2018		2019		2022		2023

Key Stage 1 ranks - top / bottom Core Cities

5 Key Stage 1 – pupil groups – EAL, SEN & FSM

- The table shows the gap with national for the same pupil group in 2023.
- The line charts show the average gap across all measures over time.
- The largest gaps are for EAL pupils (average 8.3% points across all measures) although gaps have reduced since 2022.
- Gaps have got wider over time for the typically higher attaining group (not FSM, first language English and not SEN).
- On average gaps narrowed between 2022 and 2023 for pupils with EHCPs, FSM eligible and EAL pupils.

5 Y4 multiplication check – trends and rankings

- In 2023, 26.9% of pupils scored 25 (full marks) in the Y4 multiplication tables check compared to 29.4% nationally and 28.1% in Core Cities.
- The average mark in Sheffield was 19.6 compared to 20.2 nationally and 19.8 in Core Cities.
- Sheffield’s rank improved on both measures improved between 2022 and 2023. Sheffield is currently 6th out of Core Cities for both measures.

5 Y4 multiplication check – pupil groups

- Sheffield's average mark is lower than Core Cities across most pupil groups. The gap is particularly large for pupils of Pakistani and Mixed White & Black Caribbean ethnicity.
- White British pupils in Sheffield do slightly better than White British pupils in other Core Cities but this may be due to the White British cohort having a lower % of pupils eligible for free school meals.
- Gaps with national and Core Cities are larger for pupils with EAL, FSM and SEND.

5 Key Stage 2 – attainment trends

- In 2023, 56.9% of pupils achieved the expected standard in reading, writing and maths, compared to 59.8% nationally.
- In 2023, 10 out of 11 headline KS2 measures improved compared to 2022 but only 1 has surpassed 2019 levels (% higher level in reading).
- Similarly, gaps with national and Core Cities closed for the majority of measures between 2022 and 2023 but are still larger than in 2019.

Key Stage 2 % achieving the expected level

Key Stage 2 % achieving the higher level

5 Key Stage 2 – progress trends

- Average progress between KS1 and KS2 was close to the national average in 2019 for writing and maths.
- Progress dipped in all subjects in 2022. In 2023 there has been an improvement in all three subjects although progress is still below the national average.
- The largest improvement is for reading, progress in 2023 has surpassed performance in 2019.

5 Key Stage 2 – national rankings

- Sheffield's national ranking improved for 9 out of 14 measures between 2022 and 2023 but only 3 measures rank higher compared to 2016.
- The average ranking across all measures is worse for boys (118) compared to girls (109).
- 50% of KS2 measures are in the 4th quartile in 2023 compared with 27% in 2016.

5 Key Stage 2 – Core Cities rankings

- Sheffield was ranked 5th (of 8) overall out of Core Cities in 2023.
- Whilst Sheffield's relative position amongst Core Cities improved between 2022 and 2023, it is still worse than prior to 2020.
- In 2016, 64% of KS2 indicators were in the top half of Core Cities compared to only 21% in 2023.

Average rank by group (Core Cities) (lower rank = better performance)

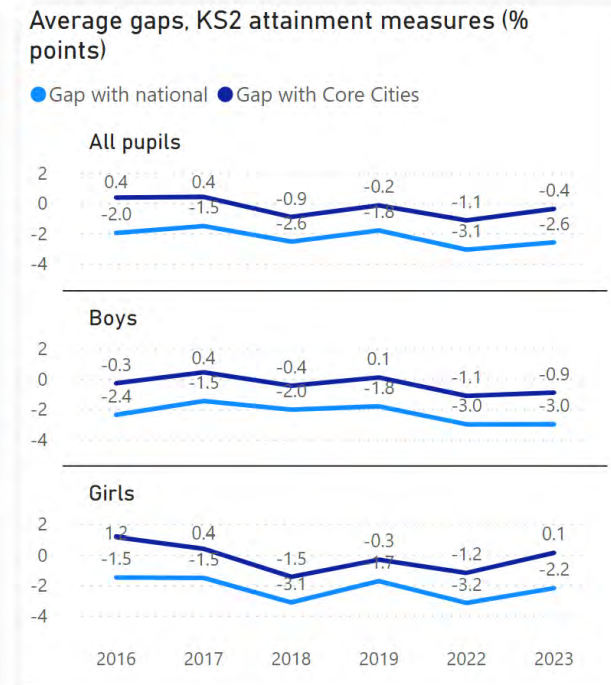

Key Stage 2 ranks - top / bottom Core Cities

5 Key Stage 2 – gaps summary

- In 2023, Sheffield was, on average, 2.6% points below national and 0.4 % points below Core Cities across all KS2 attainment measures.
- The majority of performance measures improved between 2022 and 2023 and the majority of gaps narrowed but performance is still below 2019 for most indicators.

5

Key Stage 2 – attainment gaps 2023 (EAL, FSM, SEN)

- The table shows the gap with national for the same pupil group in 2023.
- The line charts show the average gap across all measures over time.
- Sheffield was above the national average for reading, maths and combined for pupils who were not disadvantaged / eligible for FSM.
- The largest gaps are for pupils with EAL and these gaps have got wider since 2019.

5

Key Stage 2 – attainment gaps 2023 (ethnicity)

- The table shows the gap with national for the same pupil group in 2023.
- White British is the only ethnic group with large pupil numbers where performance is above the national average for some indicators.
- Levels of FSM eligibility are higher in the BAME population in Sheffield compared to the national average and does have an impact on the attainment gaps.

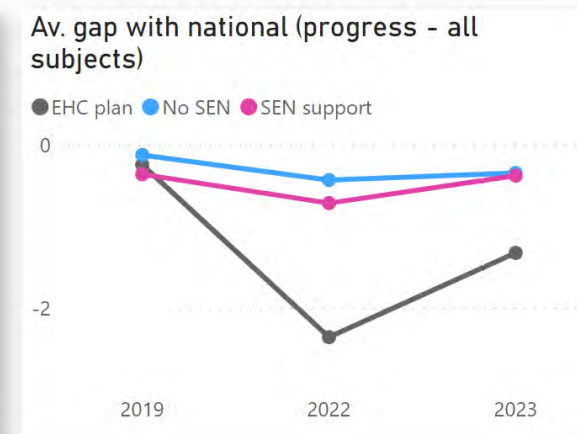

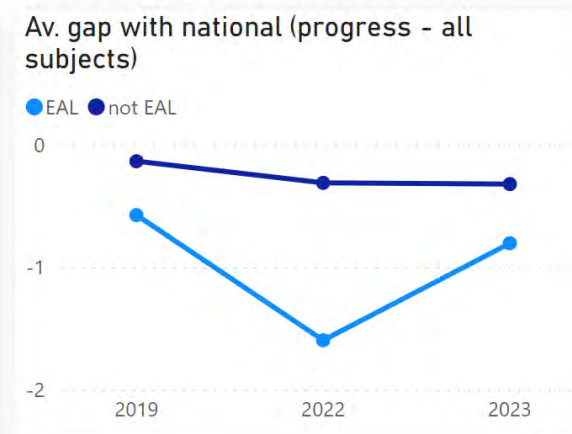

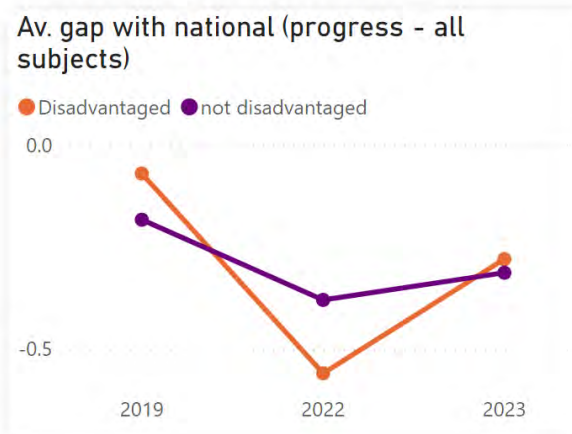

subject ethnic group	% RWM expected		% reading expected		% writing expected		% maths expected		% SPG expected		% science expected

Key Stage 2 – progress gaps 2023 (EAL, FSM, SEN)

- The table shows the gap with national for the same pupil group in 2023.
- The line charts show the average gap across all measures over time.
- Progress for all pupil groups across all subjects is below the national average in 2023.
- Gaps did close between 2022 and 2023 for most pupil groups and particularly for those with the lowest progress in 2022 (EAL, disadvantaged and pupils with EHCPs).

Key Stage 2 – progress gaps 2023 (ethnicity)

- This table shows that there is significant variation in progress by ethnic group.
- Progress is above the national average for some ethnic groups. Notably Gypsy/Roma pupils make good progress in reading and writing from low starting points.
- Progress is poor and the gaps with national are large for pupils from Black and some Mixed ethnic groups. Progress in writing and maths is also poor for White British pupils.

Key Stage 4 – attainment & progress trends

- Results were expected to reduce this year due to post-pandemic ‘adjustment’. The most meaningful comparison is against 2019.
- The trend in Sheffield is in line with national. Sheffield’s relative position has improved slightly in national rankings and overall gaps with national have reduced since 2019.
- Sheffield’s performance is overall slightly above average for Core Cities.
- Progress 8 has improved since 2022 but not yet back to 2019 performance.

5 Key Stage 4 – additional indicators

- Additional measures are published in the Performance Tables data release from the DfE.
- P8 gap largest for high attaining pupils.
- Subject P8 is highest for maths and lowest for Ebacc.
- Attainment gap is largest for Science (Ebacc subject area), Sheffield is 6% points below national for 9-4 pass.
- Sheffield is above national average for the language subject area (out of pupils entered).

Indicator	National	Sheffield	difference

% of pupils achieving the Ebacc English subject area with a strong 9-5 pass	61	57	-4

5 Key Stage 4 – national rankings

- Overall national rankings have improved since 2022 although not quite as high as in 2019.
- Attainment 8 remains the only measure in the bottom quartile.

Key Stage 4 – pupil group results and gaps

- The tables below show results for each pupil group and the gap with the national and Core Cities average for the same group.
- Sheffield is below national for most groups, gaps are largest for EAL, SEN and FSM pupils.
- Sheffield is significantly below the Core Cities average for pupils with EAL, eligible for FSM and with SEN support.

Key Stage 4 – pupil group results (ethnicity) and gaps

- The tables below show results for each ethnic group and the gap with the national and Core Cities average for the same group.
- Although a number of ethnic groups have a positive progress 8 result, this is generally below the result for the same group nationally and in other Core Cities.
- White British pupils do better than the Core Cities average for both progress 8 and the % achieving a grade 4+ in English & maths.

Key Stage 5 – trends

- 2023 saw a return to pre-pandemic grading. It is most meaningful to compare results to 2019. The data presented below is provisional.
- The average point score (APS) for A-levels in Sheffield in 2023 was 33.8 (C+) compared to 34.0 nationally and 33.0 in Core Cities.
- Sheffield's APS for applied qualifications was below the national and Core Cities average (28.8 compared to 29.4 in Core Cities and 29.5 nationally).
- Sheffield's APS for technical levels was higher than the national average and Core Cities average. Technical levels are only taken by a small number of students (225 in Sheffield in 2023).

Key Stage 5 – rankings

- Sheffield is in the 2nd quartile nationally (top half of LAs) for performance in A-levels and T-levels and in the 3rd quartile for performance in applied general qualifications. National rankings have worsened since 2019, particularly for applied general qualifications.
- Sheffield's ranking within Core Cities has improved for A-levels and T-levels (both 3rd in 2023) but worsened for applied general qualifications (6th in 2023).

5

Key Stage 5 – student groups – A-levels

- Whilst Sheffield's APS for A-levels is above Core Cities for all students, there is significant variation within groups. In particular, students with EAL and disadvantaged students do less well in Sheffield compared to Core Cities.
- White students perform better than the national and Core Cities average, but performance is lower for all other ethnic groups (except Chinese).
- Students with higher prior attainment (7+ at KS4) do better in Sheffield compared to similar students nationally.

5

Key Stage 5 – student groups – applied general qualifications

- For applied general qualifications Sheffield is generally below national and Core Cities for most student groups.
- Similar to A-levels, the gaps are larger for students with EAL and disadvantaged students.
- Students with lower (grades below 4 at KS4) and higher prior attainment do relatively less well in Sheffield compared to the same groups nationally.

5 Analysis of outcomes by attendance band - primary

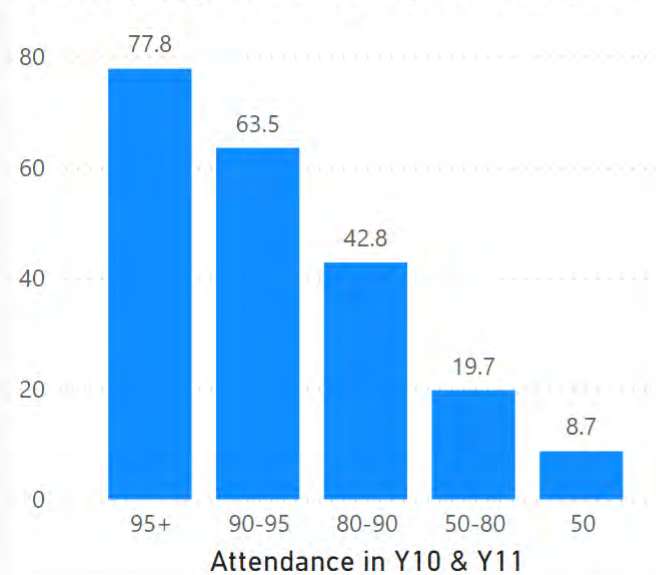

- To explore further the relationship between school attendance and attainment outcomes, 2023 attainment outcomes are presented by attendance band.
- The relationship between attendance and attainment is clear. Moving from 80-90 to 90-95 attendance band would have an impact on results.
- There are fewer pupils in the lower attendance bands as age increases, we also know that prior attainment is a key determinant of later attainment so suggests a focus on attainment in EYFS & KS1.

5 Analysis of outcomes by attendance band - secondary

- A similar pattern is seen at KS4.
- Once attendance drops below 90% the chance of achieving a grade 4+ in English and maths drops significantly.
- Nearly 28% of the KS4 cohort in 2023 had average attendance below 90% in Y10 and Y11.

% of pupils grade 4+ in English & maths

% of pupils by attendance band (Y11 - 2022/23 & Y10 2021/22)

Outcomes for children and young people

- At each key stage, the gap between attainment in Sheffield and the national average is around 2-4% points. For an average year group of around 6250 pupils this would require an additional 125-250 pupils at each key stage achieving the threshold measure for Sheffield to be at the national average.
- At individual pupil level, factors such as attendance, deprivation and ethnicity impact on outcomes meaning that some pupils are significantly less likely to achieve than others.
- At each key stage less than half of pupils with attendance below 90% (persistently absent pupils) achieve the required standard at the end of the key stage. This represents around 1250 pupils in each year in primary and 1500 pupils in each year in secondary who have less than a 50% chance of achieving the expected level of attainment if current attendance levels don't improve.

Trails for further investigation

- **5.1** What is the impact of Sheffield's more challenging context on attainment outcomes, and does this provide insight into the disparity between pupil and setting inspection outcomes?
- **5.2** Which pupil characteristics are associated with lower attainment and what impact do they have?
- **5.3** What does a further analysis of the impact of poor attendance on life chances and the settings with the strongest attendance relative to their context tell us about what works to improve attendance?
- **5.4** What aspects of children's early development, such as speech, language and communication, have the greatest impact on outcomes in early years and beyond?
