

Sheffield Support Grid Exemplification (SSGe)

Introduction

This document provides the Sheffield Support Grid Exemplification (SSGe) for school-aged Children and Young People (CYP). A separate version, the *Early Years Sheffield Support Grid Exemplification (EYSSGe)*, is available to support children in the early years. Although both documents follow the same structure, the descriptions of presentation and suggested support are tailored to the Early Years cohort in the EY SSGe.

Both documents incorporate considerations for *Preparation for Adulthood* based on the four broad areas of need, which Post-16 providers can use to guide their support and provision for young people transitioning to adulthood.

The Sheffield Support Grid Exemplification is an extension of the original Sheffield Support Grid. It draws from the principles of *Quality First Teaching* as outlined in the *Removing Barriers to Achievement* (2004) paper, as well as the *National Strategies' Three Waves of Intervention* model. The document provides strategies and guidance from these frameworks, alongside practitioner insights, to support pupils in both primary and secondary settings.

The grid uses the official categories of need (Communication and Interaction, Cognition and Learning, Social, Emotional and Mental Health, Sensory and/or Physical) defined in the *Special Educational Needs and Disability (SEND) Code of Practice: 0-25 years* (2014). It outlines teaching and learning strategies appropriate for each identified need, as well as suggested interventions, assessment tools, and possible additional services that may support the child or young person. Each category of need is broken down into five levels to accommodate a spectrum of presentations—from mild to more complex needs—enabling targeted support for all levels of need.

In the revised document, we have introduced the *Ordinarily Available Toolkit* to accompany each area of need. This addition, made in January 2025, outlines the support and resources that mainstream schools and settings should provide for CYP with special educational needs and disabilities. The *Ordinarily Available Toolkit* describes the provision that can be delivered from a school's existing resources, without requiring additional specialized support. This toolkit captures the provision offer that was previously described in level 1 and 2.

The updated 2025 version also introduces levelling grids for *Speech and Language Needs* and *Cognition and Learning Needs*. These grids are designed to help practitioners assess a broader range of factors contributing to a CYP's presentation, aiding in the identification of appropriate levels of need and the most effective support strategies.

Key revisions in the 2025 update include:

- The consolidation of *General Learning Needs* (2a) and *Specific Learning Needs* (2b) into a single section titled *Cognition and Learning*.
- The merging of *Emotional Regulation* (3a) and *Mental Health* (3b) into a unified section titled *Social, Emotional, and Mental Health*.
- The addition of a new section, *Sensory Needs* (4e), to assist practitioners in considering the appropriate support for sensory-related challenges.

In addition to the strategies outlined in this document, it is expected that the needs of a CYP will also be addressed through using the range of support detailed in the [Sheffield Local Offer](#).

Through the document acronyms are used. Please consult the [SEND glossary](#) for clarification.

Handy tip: Wherever you see the  icon to the bottom left of a page, click on it and it will bring you back to this page.

1A Communication and Interaction – Language and Understanding

Levelling Grid

Levelling Grid Sheffield Support Grid: 1A Communication and Interaction - Language and Understanding To identify a CYP's overall level, consider the level of impairment (provided by Speech and Language Therapy) alongside the other areas of presentation. Use a best fit judgment to derive the level of need.				
Level	Impairment (level identified by formal assessments carried out by Speech and Language Therapy)	Activity (level identified by teaching staff / parent/carer)	Participation (level identified by teaching staff / parent/carer)	Wellbeing and emotional regulation (level identified by teaching staff / parent/carer)
1	Mild language difficulties: <ul style="list-style-type: none"> Mild problems in either, or both, understanding and expression. Language following normal patterns of development. Scores on standardised assessments falling below 16th centile 	Some difficulty communicating verbally with unfamiliar people or in unfamiliar contexts	Occasional difficulties in participating in unfamiliar educational and social activities. Needs encouragement to achieve potential	Occasionally displays mild: distress/ upset/ concern/ frustration/ anger/ distress/ embarrassment/withdrawal
2	Mild to Moderate language difficulties: <ul style="list-style-type: none"> Moderate problems in either, or both, understanding and expression. Standardised scores on formal assessments fall below 9th centile in at least one area. 	Some difficulty communicating verbally <ul style="list-style-type: none"> Needs some cues and adult assistance or extra time when conveying information beyond basic needs 	Occasional difficulties in participating in unfamiliar educational and social activities. Needs support to achieve potential	<ul style="list-style-type: none"> Frequently displays mild Distress/ upset/ concern/ frustration/ anger/ embarrassment/withdrawal Occasionally needs external support to assist emotional control.
3	Moderate to severe language difficulties: <ul style="list-style-type: none"> Severe/moderate problems in either, or both, understanding and expression. Standardised scores on formal assessments fall below 5th centile in at least one area. 	Frequent difficulty communicating verbally beyond basic needs. Frequently relies on a trained listener or family members for expressing themselves out of context.	Frequent difficulties participating in social activities in unfamiliar contexts or with unfamiliar people. Frequent difficulties participating independently in unfamiliar educational activities	Occasionally shows moderate Distress/ upset/ concern/ frustration/ anger/ distress/embarrassment/ withdrawal <ul style="list-style-type: none"> Emotional encouragement and support required

1A Communication and Interaction – Language and Understanding

Levelling Grid

Level	Impairment (level identified by formal assessments carried out by Speech and Language Therapy)	Activity (level identified by teaching staff / parent/carer)	Participation (level identified by teaching staff / parent/carer)	Wellbeing and emotional regulation (level identified by teaching staff / parent/carer)
4	Severe language difficulties: <ul style="list-style-type: none"> Severe problems usually involving both understanding and expression, although one area may be more profoundly affected. Standardised scores will fall below the 1st centile in at least one area of expression or understanding. CYP may be unable to engage with formal assessments. 	Constant difficulty communicating verbally beyond basic needs. Occasional difficulties communicating basic needs. Frequently relies on a trained listener or family members for expressing themselves in any context.	Frequent difficulties participating in social activities, even with familiar people and contexts. Frequent difficulties participating independently in educational activities.	Frequently displays moderate levels of distress/ upset/ concern/ frustration/ anger/ distress/embarrassment/ withdrawal <ul style="list-style-type: none"> A structured approach to emotional support from others is required.
5	Profound language difficulties: <ul style="list-style-type: none"> Profound problems are evident in both understanding and expressive language, although one area may be more profoundly affected. Standardised test scores fall below the first centile in all areas of language assessment. CYP may be unable to engage with formal assessments. 	Minimal functional communication limited to expressing basic needs, usually requiring tailored use of AAC. <ul style="list-style-type: none"> Constant dependence on trained / familiar communication partner. 	Profound difficulties participating in educational and social activities.	Frequently displays high levels of distress/ upset/ concern/ frustration/anger/ distress/ embarrassment/ withdrawal Unable to express or control emotions appropriately. Difficulties responding to external support to control emotions. <ul style="list-style-type: none"> A tailored and structured approach to emotional support is required.

1A Communication and Interaction – Language and Understanding

Ordinarily Available Provision for 1A Language and Understanding & 1C Speech and Stammering

A Classroom Support Guide for Pupils Presenting with Speech, Language and Fluency Differences Universal Support - Classroom Strategies	
Positive and effective relationships	<ul style="list-style-type: none"> • Adult support for learning as required. • Awareness that speech and language difficulties may impact confidence. • Some support to be available for communication and emotional regulation. Eg CYP's frustration leads to anger, and the CYP is unable to quickly give an account to the teacher due to unintelligible speech. More information can be found here • CYP are explicitly taught how to listen and work together in groups • Opportunities are built in throughout the day for pupils to communicate verbally. • Consideration of time needed to process language More information can be found here
Enabling environments	<ul style="list-style-type: none"> • Visual support (signs, symbols, photographs, written word) is consistently used to label the classroom / support routines/ timetable daily activities, so pupils know what to expect and when: More information can be found here • Noise levels are conducive to learning and unnecessary noise is minimised • Consideration is given to seating position in order to maximise CYP's attention levels • Offer individual programmes of work (based on targets set by speech and language therapy staff for blocks of intervention (generally 6-8 weeks per block on input) with reinforcement in whole class activities to aid transfer of skills. Seek support from the SALT service where required to enable staff to deliver programmes. • Be aware of the possible impact on vocabulary acquisition and word finding difficulties and use the following adjustments: <ul style="list-style-type: none"> ○ Pre and post tutoring is used to enable the pupil to engage with learning in the classroom. ○ Vocabulary teaching and visual word mats used in lessons: More information can be found here ○ Support CYP to develop an increased awareness of phonemic structure eg syllable clapping, initial sounds, rhyme, and semantic structure eg category, function etc ○ See SLT wave 2 training on vocabulary • Seek support from the SALT service to enable staff to deliver speech programmes or fluency strategies in the school context.

1A Communication and Interaction – Language and Understanding

Ordinarily Available Provision for 1A Language and Understanding & 1C Speech and Stammering continued

Access to Learning	<ul style="list-style-type: none"> • Word mats available to support vocabulary and spelling • Use of visual, auditory and kinaesthetic approaches • Resources and displays that support independence • Pre-learning of language combined with visuals to support this learning in classrooms • Alternative forms of recording used for some pieces of work, especially pieces of longer length • Consistent use of gestural system of sound representations (e.g. Cued Articulation, Jolly Phonics) where a gesture is used to represent a phoneme/speech sound, be aware of any sounds the CYP is struggling with and ensure this is a focus: More information can be found here • Pupil accesses appropriate wave 2 language intervention e.g. LEAP, NIP, VIP, Stories for Talking , or appropriate small groups or sets: Training can be accessed here
Communication	<ul style="list-style-type: none"> • CYP accesses group for additional phonological interventions where this is identified as a weakness and / or speech intervention e.g. Rhythm and Rhyme. • Teacher is aware of the learning taking place in the intervention group, and this feeds back into their planning e.g. speech and fluency language is supported back in class, literacy objectives and activities show consideration. • Advice from Speech and Language Therapy (if involved) is included in the planning • Reduce language demands for CYP with language difficulties. • Early strategies • Higher level strategies • Consult the Speech and Language Library of Support where needed

1A Communication and Interaction – Language and Understanding

Level 3

<p>The CYP shows moderate to severe difficulties with expressive and/or receptive language that affects access to the curriculum. The CYP's needs are met using a combination of approaches (Including small group interventions and 1:1 individualised support in and out of the classroom) following support and advice from other professionals as appropriate.</p> <p>At secondary this student may be following a different curriculum pathway.</p>			
Provision: Some targeted and individual interventions over the week		Reviews: 3 per year	Documents: Support Plan or Extended Support Plan
Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>Please use Speech and Language Therapy referral form for further guidance as the severity of need with language depends on the age and stage of the child.</p> <p><u>Impairment (to be identified by SALT)</u></p> <p>Moderate to severe language difficulties: Severe/moderate problems in either, or both, understanding and expression.</p> <p>Standardised scores on formal assessments fall below 5th centile in at least one area.</p> <p>In addition, one or more of the following (identified by teaching staff/parents) also applies:</p> <p>Continued on next page</p>	<ul style="list-style-type: none"> • Observation • Data tracking • Teacher assessments • CYP Progress meetings • CYP/Young Person voice • One Page Profile/Learner Profile • Parent/Carer voice <p>An Extended Support Plan may be in place to draw together information, advice, aspirations and planned outcomes</p> <p>Screening tools and / or assessment tools as identified</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p> <p>Access arrangements considered</p>	<p>Ordinarily Available provision whilst also including –</p> <p>Adjustments to Teaching Methods Staff should consider and implement as appropriate:</p> <ul style="list-style-type: none"> • Teaching staff should have knowledge of the CYP's language profile and impact on learning, behaviour and social interaction. • The class/subject teacher is accountable for the progress of the CYPs within the mainstream class. Curriculum tasks should be modified as required. • Enhanced use of visual support for language and learning e.g. Shape Coding, Makaton, Cued Articulation, vocabulary mats. <p>Continued on next page</p>	<p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p> <p>Additional advice and support is available from:</p> <p>Educational Psychology Service</p> <p>Speech and Language Therapy</p> <p>Fusion SEND Hub/Learning Support</p>

EAL considerations

- For EAL pupils – Use [The Bell Foundation](#) to track Language development to help ascertain if the CYP has a SEND need
- Try completing home language assessments where available - The EAL team can do these for you

1B Communication and Interaction covers the following areas:

- 1) **Communication and Social Concepts** - Differences in understanding and expressing forms of communication and language, with skills ranging from individuals who are highly articulate (but comprehension may vary) to others who may be non-speaking. We also need to consider differences in understanding social behaviours and the actions and feelings of others, which inform the development of friendships and relationships.
- 2) **Sensory Processing (please note this area is covered further in Section 4E)** - Differences in perceiving sensory information. Hypo (low sensitivity), hyper (high sensitivity) to sensory stimuli such as touch, hearing, smell, taste, balance (vestibular), body awareness (proprioceptive) and also an internal sense called Interoception (this manages emotions and bodily functions).
- 3) **Flexibility, Information Processing and Organisational Skills** - Differences in perception, planning, understanding concepts, generalising, predicting, managing transitions, passions for interests and ability to absorb auditory or spoken information.

Ordinarily Available

This is Universal Support – as part of the Graduated Response. See [assessment tools](#), [interventions and further support](#) that supports your teaching practice.

Ordinarily Available provision and teaching approaches for all learners with a recognition that some learners may require very time-limited support to secure effective application of skills and increase their engagement and access to all areas of school life. School will lead in this approach.

The table on the following pages references 4 key areas within social communication differences that would constitute reasonable adjustments if embedded within the classroom/school. [Autism Social Communication Education and Training Service](#) (ASCETS) offer centralised training that supports with many strategies recommended.

A Classroom Support Guide for Pupils Presenting with Social Communication Differences

Universal Support - Classroom Strategies

(SEN Guide to Reasonable Adjustments)

Positive and Effective Relationship

- Value pupil voice, pupils will feel safer and happier when they feel listened to.
- Learn about the pupil prior to arrival, effective communication with pupil, parents/carers, previous teachers, is key to building mutual respect.
- If concerned about a presenting need, observe the pupil in various context, structured and un-structured. This will allow you to gain valuable information in likes/dislikes, areas/activities a pupil is drawn to and avoids.
- Support pupil in developing a strong sense of belonging, to ensure pupils feel safe and secure i.e. greet all pupils at the door saying their name (don't expect a response).
- Make use of roles/responsibilities. A sense of purpose is a great way to build in structure and routine
- The arrival routine should be clear and consistent, everyone should have a plan as to what is happening next and when.
- On arrival, offer activities that are motivating - ensure the start of the day is welcoming, engaging and purposeful.
- Clear structure, rules and routines will provide a sense of safety – do not presume understanding, rules will need to be revisited regularly in all environments (displayed visually)
- Encourage discussion about the pupils' interests – this could make a huge difference in escalating stress levels.
- Provide an emotionally available adult or peer to 'check-in' with pupil. Provide morning, lunchtime and after school clubs linked to interests.
- Agree a signal (age/stage appropriate) that pupil can use indicate if they are becoming overwhelmed in class i.e. Help Card.
- Be willing to prioritise well-being over completion of an academic task i.e. offer movement breaks/fresh air before the end of session.
- Model and practice de-escalation techniques with all pupils – rehearsed techniques will be drawn upon easier in times of crisis
- Notice and react to a pupil's 'signature' behaviour change, prior to hitting crisis – have a plan!
- Make use of outdoor environment, a great space for emotional regulation.
- Pupil to be offered additional warning to prepare for unexplained changes.
- Low Arousal approaches should be 'the norm' in all classrooms
- Ensure micro and mini transitions are managed effectively. i.e. structure movement around school/verbal countdown to completion of task.
- Consider developing a network of pupil neurodiverse champions in settings.
- Consider how your pupil spends break and lunch times and what support might be needed with this (remember to value their choice if they choose to be alone)
- Use visuals to reinforce verbal instructions.
- Allow pupils time to process information
- Using a graduated response, relevant ways of recording a child's required support, are used effectively. This is shared with all relevant staff to encourage consistent approaches.
- Avoid putting children on the spot to answer questions (unless you know that they are comfortable with this).
- Use visuals and structured tasks, incorporating the student's own interests wherever possible.

Continued on next page

1B Communication and Interaction – Social Communication

Ordinarily Available continued

Enabling Environment

- Provide visual supports to ensure that upcoming activities are predictable and understandable.
- Visual timetables - unfussy and understandable with consistent size and font across school.
- Task board checklists
- Timers
- Now and Next boards, flexible whiteboards
- Choice boards
- Key communication symbols on lanyards
- Object cues and objects of reference
- Transitions are supported with appropriate visuals/approaches.
- Classroom environment e.g. surfaces need to be uncluttered and organised.
- Learning areas are clearly defined throughout the classroom.
- The whiteboard is free of visual clutter – for 1m around the perimeter.
- Schedule structured time throughout the day for time engaging in or discussing their hobbies/interests.
- Seating considerations – based on a sensory checklist.
- Ensure the timetable encourages regular sensory and movement breaks.
- All resources are organised in labelled drawers/cupboards to encourage independence.
- Pupils own work is displayed and labelled appropriately.
- Noise levels are well managed so that pupils and adults can hear one another.
- Transition times work effectively and are structured to reduce noise and movement levels.
- Offer a range of sensory equipment wobble cushion, stress ball and fiddle ball.
- Use the environment to engage your pupil including aspects of their special interests? e.g. shiny, dangling items near carpet to hold attention whilst sitting with peers.
- Environmental considerations are made to meet the known needs the pupil e.g. seating position, noise, personal space and classroom layouts, displays and signage.

Continued on next page

1B Communication and Interaction – Social Communication

Ordinarily Available continued

Access to Learning	<ul style="list-style-type: none"> Flexibility will be used with children's individual timetables, to acknowledge children who 'mask' will have varying energy levels throughout the day. Visual support will be used alongside verbal lesson content to support memory and the retention of information i.e. written accounts, list, picture, or task boards. Consistency of approach amongst staff – rewards, routines and language. Provide a non-speaking strategy for children to request help i.e. a red dot on the end of a ruler. Provide a non-speaking strategy for children to request a break i.e. a break card. Provide time to apply learnt skills in different environments/contexts. Visual cues and prompt cards to support the understanding of school expectations. Opportunities to develop collaborative group / paired working, allocate roles as required. Use a range of tools to support learning and independence e.g. knowledge organiser, dictation tools. Where appropriate, choices are given within tasks. Visual supports used to break down tasks into manageable chunks Expectations of the amount of work will vary to match the child's stress levels. Children will not be expected to exceed the agreed expectation of an individual task to maintain trust.
Social Communication	<ul style="list-style-type: none"> Understand that all behaviour is a form of communication Make the pupil's day as predictable as possible i.e. Visual board which includes tasks, sensory information, special interest time. Ensure clarity in verbal instructions. Understand pupil's communication skills may differ depending on their stress levels. Remember the use of language and the understanding of language are 2 different processes. Value non – verbal communication. Use a total communication approach across school. Say pupils' name first to gain attention. Give the pupil time to process information. Say things in the order they will happen. Use clear, reduced, and consistent language. Use positive and directive language e.g. Tom feet on the floor – rather than Tom stop kicking. Explain the meaning of any idioms / jokes used Support pupils with understanding social concepts (don't teach them explicit social skills) Use of Visual tools will benefit all pupils with the following: <ol style="list-style-type: none"> increase self- help and independence skills 'see' the task and identify the stages of what they need to do where they will do it and who with how long they will do the task for what happens when they have finished when can they do their favoured activity anxiety levels

1B Communication and Interaction – Social Communication

Level 3

CYP Presentations: The CYP shows social, communication and interaction differences in a range of situations which may affect access to academic learning and heighten stress levels in unstructured/social time. Longer term, these barriers may impact CYP social, emotional and mental health if not well supported.			
Provision: Some targeted and individual interventions over the week		Reviews: 3 per year	Documents: Support Plan or Extended Support Plan
Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
Consider if the following statements describe how the CYP presents in school: Communication and Social Concepts: <ul style="list-style-type: none"> • Receptive and expressive communication is likely to differ • Words and phrases may be taken literally. • Processing time may differ. • Body language may be misinterpreted. • Thoughts may be spoken out loud (if appropriate or not). • Immediate and delayed echolalic language may be used (repeating/ mimicking phrases previously heard). • CYP may present with fleeting attention to verbal instruction (appearing not to hear). 	<p>In depth assessments and observations that help unpick and inform individualised next steps and outcomes for the young person (see assessment toolkit). This may include a sensory profile of needs.</p> <p>Outside agencies' advice and recommendations used to further inform next steps for the young person, if involved.</p> <p>Planning may need to incorporate adaptations such as rest breaks, time allocated to sensory-differences and processing needs.</p> <p>Consider access arrangements. Multi Agency Planning where appropriate.</p> <p>Progress is closely monitored using AET resources and/or school tracking systems and shared with family. Continued on next page</p>	<p>Ordinarily Available provision whilst also including:</p> <p>Adjustments to Teaching Methods Staff should consider and implement as appropriate</p> <ul style="list-style-type: none"> • Identify CYP interests and use to gain attention to task. • Individual support working on, building and developing key skills in learning, life skills and social skills. • Consider adaptations to the school day e.g. soft start, finish times, time in a safe place for the CYP to 're-set' throughout the day etc. • Allow access to an emotionally available adult as the CYP requires. • Planned time to access tasks of their own preferred choice. <p>Continued on next page</p>	<p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p> <p>Discuss concerns with:</p> <p>Autism Social Communication Education and Training Service (ASCETS) Link Teacher (contact details)</p> <p>Educational Psychology Service</p> <p>Speech and Language Therapy</p> <p>Sensory Service Sheffield Children's Hospital</p>

1B Communication and Interaction – Social Communication

Level 3 continued

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<p>Communication and Social Concepts (continued):</p> <ul style="list-style-type: none"> Dispute with peers may occur frequently. There may be an insistence for sameness and routines. There may be an insistence to play games on their terms/by their rules. Conversation 'rules' may not be followed e.g. jumping into two-way conversation/only speaking about topic of interest. CYP may choose to spend time alone. Isolation and social vulnerability may result from experiencing social situations differently. Initiating and successfully responding to interactions from others may need additional support. Understanding social spaces (e.g. stand and sit too closely to others) and other unwritten social 'rules' may need additional and repeated support. <p>Continued on next page</p>	<p>An Extended Support Plan may be in place to draw together information, advice, aspirations and planned outcomes.</p> <p>The voice of the young person and their family needs to be heard to form a holistic view of the young person and used to help when planning next steps.</p> <p>Use of appropriate assessment materials – refer to assessment toolkit.</p> <p>Where needed, risk assessments may be in place.</p>	<p>Adjustments to Teaching Methods (continued)</p> <ul style="list-style-type: none"> Access to a range of learning materials to support a sense of predictability (i.e. a total communication response). This may include some of the following: <ul style="list-style-type: none"> objects of reference as appropriate (e.g. symbols, photographs) visual timetables communication mats flexible whiteboard approach first/then writing frames visual prompts Visual cues to support auditory information at all stages of delivery. This may include preparation for any changes and the need for a clear and consistent routine. Reduce complex language when giving instructions and asking questions. Refer to behaviours of concern as 'stressed behaviours' ensuring a focus is on the environment and adult <p>Continued on next page</p>	

1B Communication and Interaction – Social Communication

Level 3 continued

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<ul style="list-style-type: none"> CYPs may become stressed at dealing with unfamiliar social situations (may apply effective avoidance techniques). May require support to develop friendships and relationships with adults and peers. May display unexpected behaviours (frustration/anger) in social situations. Social camouflaging (possibly referred to as masking) to 'survive' may be common. CYP may display behaviours thought of as 'attention seeking' – however more likely the CYP is wanting to interact and not knowing how to initiate an interaction. <p>Sensory Processing (See Section 4E for further information)</p> <ul style="list-style-type: none"> May require sensory adaptations in the learning space such as consideration to where they sit e.g. fiddle toys, regular movement breaks, standing desk etc. May seek to leave the classroom frequently. <p>Continued on next page</p>		<ul style="list-style-type: none"> Offer distraction free quiet area within the classroom if required. Support to recognise own emotions and those of others. Support to problem solve specific social situations. e.g. Negotiation skills, Comic-strip conversations, Talkabout series. Modelling of social language, rehearsed scripts, may be required for the CYP to engage. Physical sensory consideration such as uniform alterations, seating plan and sensory support tools. <p>Grouping</p> <ul style="list-style-type: none"> The CYP will access a variety of support over the week may include whole class teaching, small group support and daily individualised support working on personalised targets matched to their social communication profile e.g. working on individual outcomes that are repeated and reinforced. Additional adults work under the direction of the teacher. <p>Continued on next page</p>	

1B Communication and Interaction – Social Communication

Level 3 continued

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
Flexibility, Information Processing and Organisational Skills <ul style="list-style-type: none"> • May experience high anxiety with academic demands, leading to avoidance of tasks. • May have periods when they cannot be flexible in their thinking, affecting their ability to learn. • Refusal to start or end a task, may be common. • May have special interests/ruling passions, which are impacting on everyday life. • Resources for a task may be un-organised and often lost. • Would need support or consideration with transitions. • Likely show high levels of self-direction which may cause barriers to learning. • CYP may require additional consideration for safety factors. • Consideration needs to be given if it is thought CYP masking this needs to be considered in terms of energy levels and emotional well-being for the CYP. 		Grouping (continued) <ul style="list-style-type: none"> • Clear entry and exit criteria for intervention, with evidence of progress shared with the young person (where appropriate) and family. • Possible alternative GCSE pathway provision may be in place. • Adult support at unstructured/ social times (e.g. clubs). Modelling of social language, rehearsed scripts, may be required for the CYP to engage. • Transition times are managed effectively, with CYP agreements for alternative transition in place (i.e. CYP Early Exit Card). • Sensory Circuits are offered part of the timetable (these can be completed independently depending on age/stage CYP). An example of this could be the CYP has access to planned physical movement breaks. • Group or individual programmes to develop social concepts. See suggested interventions. <p>Continued on next page</p>	

1B Communication and Interaction – Social Communication

Level 3 continued

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
		<p>Grouping (continued)</p> <ul style="list-style-type: none"> The CYP can access evidence-based social, emotional and academic intervention time, either in small groups or 1:1, with the class teacher and other staff members. Use Lego Therapy/Jewellery Therapy to support social interaction. Use 'Autism Identity and Me' to support CYPs self-identity. Support to develop interoception e.g. linking bodily changes to emotions i.e. I am feeling angry, so my heart is beating faster. <p>Resources</p> <ul style="list-style-type: none"> Emotional vocabulary support, e.g. emotional thermometers / charts, linking physical feelings to emotions. Comic strip conversations e.g. a visual breakdown of playtime (what went wrong and why). Social scripts (to support them in unfamiliar or tricky situations). Sensory supports/Movement breaks. Personalised sensory plan if needed. 	

1B Communication and Interaction – Social Communication

Level 4

CYP's needs are met through a timetable, environmental adjustments and communication approaches that contains bespoke support for the parts of the school day that are needed.
It is felt the staff providing support would have the relevant, skill, expertise and training in order to understand the functions of the child's presentations of need.

Provision: Frequent, specific specialised input		Reviews: 3 per year	Documents: Extended Support Plan or EHC Plan
Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<p>Consider if the following statements describe how the CYP presents in school: Communication and Social Concepts:</p> <ul style="list-style-type: none"> Will have significant differences with language acquisition and comprehension. Will have significant differences in social understanding, which impact on relationships with adults and peers daily. May acquire language through a recognised 'Gestalt' style. May focus on intense interests in conversation, if the topic is of interest to them. May display high anxiety manifested in avoidance, dysregulation or shutdown. The frequent distress shown in school will likely impact emotional states such as resilience and energy levels. <p>Continued on next page</p>	<p>As for level 3 whilst including:</p> <p>In depth assessments and observations that help unpick and inform highly individualised next steps and outcomes for the CYP (see assessment toolkit). This should include assessment of sensory needs as well as life skills.</p> <p>The voice of the CYP and their family needs to be heard to form a holistic view of the CYP and used to help when planning next steps.</p> <p>Outside agencies' advice and recommendations used to further inform next steps for the young person, linking with multi agency planning and with a strong focus on Preparation for Adulthood discussions that will be captured in the Extended Support Plan.</p> <p>Continued on next page</p>	<p>As level 3 whilst also including –</p> <p>Adjustments to Teaching Methods Staff should consider and implement as appropriate:</p> <ul style="list-style-type: none"> Implement Low Arousal approaches – (Managing Signs of Stressed Behaviour). Low Arousal Spaces/Regulating Spaces available. Consistent approaches agreed with all to manage escalations in presentation. <p>Groupings Specific interventions may be utilised:</p> <ul style="list-style-type: none"> Use Intensive Interaction to support joint attention. Use Curiosity to support play preferences, joint attention/interaction. Use Attention Autism to support focus and attention. <p>Continued on next page</p>	<p>Additional specialist support should be sought from:</p> <p>Targeted support from Outside SEND Agencies</p> <p>Locality Panels – Stage 1 or 2</p> <p>ASCETS - Targeted Support</p> <p>Educational Psychology Service</p> <p>Speech and Language Therapy</p> <p>Sensory Service Sheffield Children's Hospital</p> <p>Health Services if involved</p>

1B Communication and Interaction – Social Communication

Level 4 continued

Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<p>Communication and Social Concepts (continued):</p> <ul style="list-style-type: none"> The CYP will need support to advocate for themselves, which would include socially accepted way of expressing wants and needs. CYP would be extremely vulnerable without adult support during unstructured times. CYP may be unable to self-manage personal care without adult support. An unpredictable emotional profile may be present, for example the CYP could display emotional dysregulation frequently. Presentation of need may impact other learners and steps will need to be taken to ensure peer understanding of CYP need. <p>Continued on next page</p>	<p>Access arrangements organised.</p> <p>Progress is closely monitored using school tracking systems and shared with family, where needed, risk assessments likely to be in place.</p>	<p>Resources</p> <ul style="list-style-type: none"> Alternative communication systems in place across school (i.e. personalised visual aids, possible use of technology to aid understanding). Stress Support Plan. This is to ensure all staff offer a safe, consistent approach to de-escalation. A rehearsed and clear exit strategy for CYP available at all times. Effective use of personalised resources based on the CYP's interests Effective use of individual visual timetable per session or activity, e.g. start / finish, now / then which does require support to implement. 	

Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<p>Sensory Processing (See 4E)</p> <ul style="list-style-type: none"> Will be often overloaded by external environmental stimuli. Sensory differences will be present to an extent that they have a significant impact on daily life, e.g. sensory avoidance/seeking within environmental settings causing visible distress and/or avoidance. <p>Flexibility, Information Processing and Organisational Skills</p> <ul style="list-style-type: none"> Transitions may be a significant difficulty. CYPs will be driven by specialist interests/ruling passions to such an extent that engagement in activities not of their choosing will likely be fleeting. Will be significantly self-directed and reluctant to follow adult direction to a level where personalised risk assessments may be required to keep CYP safe. 			

1B Communication and Interaction – Social Communication

Level 5

The CYP shows severe and persistent communication and interaction differences which will significantly impact their educational access into adulthood.

The CYPs holistic needs will be met through a robust multi-agency plan which would include personalised curriculum and an equal focus on academic, social communication, social emotional support and independence/life skills. Consistent adult support to attend to most tasks with a total communication environment/AAC, access to a flexible, personalised sensory lifestyle and responsive timetable planned to meet specific outcomes will be available – likely devised by a multi-disciplinary team including school staff, Local Authority SEND agencies and CYP/family (where appropriate).

Provision: Daily, specific specialised input at all times across all aspects of the curriculum		Reviews: 3 per year	Documents: Usually have an EHC Plan
Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<p>Consider if the following statements describe how the CYP presents in school: Communication and Social Concepts:</p> <ul style="list-style-type: none"> Will have severe and complex language needs and require a total communication approach from highly trained experienced staff. May be non-speaking or minimally speaking. Vocalisations maybe be used and decipherable to known people. Will need high levels of multi-sensory support in an adapted environment. <p>Continued on next page</p>	<p>As for Levels 3 and 4 assessment of needs, progress and setting of next steps will be collaborative in nature with school staff working alongside the family and child/young person Outside Agency professionals (including Health and Care colleagues where appropriate)</p> <p>At Level 5, it is expected a EHCP will normally be in place to recognise the CYPs' needs and provision required to meet them.</p> <p>Support MUST include:</p> <ul style="list-style-type: none"> Outside agency advice and recommendations. Multi agency planning. 	<p>There is agreement between professionals (Educational Psychology Service, ASCETS Teacher, Locality SENCO, Local Authority SEND Manager etc.) that the CYP's needs and provision in place constitute a Level 5.</p> <p>Staff should have considered and implemented effective and appropriate strategies from previous levels, especially level 4. In addition, the following will be in place:</p> <p>Adjustments to Teaching Methods Staff should consider and implement as appropriate</p> <ul style="list-style-type: none"> Robust planning to meet objectives defined in EHC plan. <p>Continued on next page</p>	<p>Additional specialist support should be sought from:</p> <p>Targeted support from Outside SEND Agencies</p> <p>Specialist Training e.g. Studio 3</p> <p>Locality Panels – Stage 1 or 2</p> <p>ASCETS – Targeted Support</p> <p>Educational Psychology Service</p> <p>Speech and Language Therapy.</p> <p>Sensory Service Sheffield Children's Hospital</p> <p>Health Services if involved.</p>

1B Communication and Interaction – Social Communication

Level 5 continued

Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<p>Communication and Social Concepts (continued):</p> <ul style="list-style-type: none"> Will need bespoke, personalised support from highly skilled, trained staff – guided by outside agencies. May display or experience significant distress, high anxiety manifested in avoidance, dysregulation or self - harm on a regular basis in a range of settings. Will need a high level of personalised support to play or work alongside others successfully. <p>Sensory Processing (See 4E for further information)</p> <ul style="list-style-type: none"> Will experience severe sensory needs that have a very significant impact on everyday life, e.g. avoidance of environment or activity, significant distress or inability to attend and focus in a classroom situation. <p>Continued on next page</p>		<p>Adjustments to Teaching Methods (continued)</p> <ul style="list-style-type: none"> Access to a quiet area within the classroom must be available when needed to offer opportunities for distraction free learning. Alternative communication systems in place across the setting i.e. bespoke visual aids plus possible use of technology to aid understanding. <p>Grouping</p> <ul style="list-style-type: none"> The CYP will access a bespoke curriculum at all times throughout the school day, to access school life. A variety of groupings must be used to ensure learning, including time in a quiet, distraction free environment. A continuum of support will be needed throughout the school day. <p>Resources</p> <ul style="list-style-type: none"> Environmental consideration based on CYP Sensory Preferences (bespoke Sensory Lifestyle devised). 	

1B Communication and Interaction – Social Communication

Level 5 continued

Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
Flexibility, Information Processing and Organisational Skills; <ul style="list-style-type: none">• Will need very high level of additional prompts and supports to carry out any adult led activities.• Will be driven by specific interests (these may be sensory) which impact on everyday life, to the extent where staff will need to use these to positively engage, appreciate and monitor.• Will need bespoke, personalised, skilled adult support to follow all activities and keep self and others safe

1C Communication and Interaction: Speech and Stammering

Levelling Grid

Levelling Grid Sheffield Support Grid: 1C Communication and Interaction – Speech and Fluency/Dysfluency To identify a CYP's overall level, consider the level of impairment (provided by Speech and Language Therapy) alongside the other areas of presentation. Use a best fit judgment to derive the level of need.				
Level	Impairment (level identified by formal assessments carried out by Speech and Language Therapy)	Activity (level identified by teaching staff / parent/carer)	Participation (level identified by teaching staff / parent/carer)	Wellbeing and emotional regulation (level identified by teaching staff / parent/carer)
1	Mild speech difficulties: <ul style="list-style-type: none"> Occasional errors in speech May be articulatory difficulties (mis pronunciation of certain sounds eg slushy 's') May be phonemic errors eg substitutes 't' for 's' May be delayed speech eg uses 'w' for 'r' at age 8 years Does not usually impact on intelligibility. The child is stammering 	Some difficulty communicating verbally with unfamiliar people or in unfamiliar contexts	Occasional difficulties in participating in unfamiliar educational and social activities. Needs encouragement to achieve potential	Occasionally displays mild: distress / upset / concern / frustration /anger / distress / Embarrassment / withdrawal

Continued on next page

1C Communication and Interaction: Speech and Stammering

Levelling Grid continued

Level	Impairment (level identified by formal assessments carried out by Speech and Language Therapy)	Activity (level identified by teaching staff / parent/carer)	Participation (level identified by teaching staff / parent/carer)	Wellbeing and emotional regulation (level identified by teaching staff / parent/carer)
2	Mild to Moderate speech difficulties: <ul style="list-style-type: none"> Significant range of articulatory difficulties affecting intelligibility Or <ul style="list-style-type: none"> Many speech sounds substituted due to a range of typical phonological processes used, persisting beyond age expected norms. May involve difficulties with some aspects of phonological awareness and literacy development. May involve one atypical process or non English sound. Intelligibility is affected especially with non familiar listeners The child is stammering 	Some difficulty communicating verbally <ul style="list-style-type: none"> Needs some cues and adult assistance or extra time when conveying information beyond basic needs 	Occasional difficulties in participating in unfamiliar educational and social activities. <ul style="list-style-type: none"> Needs support to achieve potential 	Frequently displays mild Distress/ upset/ concern/ frustration/ anger/ embarrassment/Withdrawal <ul style="list-style-type: none"> Occasionally needs external support to assist emotional control.

---	--	---	--

- The SALI team will advise on school support and offer training but will not provide a programme as individual support is offered in a clinic setting.
- Consideration of time needed to deliver the message.

Grouping

- Regular (preferably daily) opportunities for individual support for speech difficulties focused on specific targets, with reinforcement in whole class activities to aid transfer of skills
- Opportunities for CYP to access paired/social groups, with a skilled adult and/or symbol facilitated support, to increase successful communication in social situations.
- CYP accesses groups for additional phonological awareness interventions
- The teacher is aware of the learning taking place in the intervention group, and this feeds back into their planning e.g. speech is supported back in class, literacy objectives and activities show consideration.

Continued on next page

1C Communication and Interaction: Speech and Stammering

Level 3 continued

id support

Grouping (continued)

- The CYP accesses small groups and 1:1 support as advised by the Speech and Language Therapy team.
- Support to be available for communication and emotional regulation: e.g. CYP's frustration leads to a behaviour incident, and the CYP is unable to quickly give an account to the teacher due to unintelligible speech.

Resources

- Offer individual programmes of work, delivered on a regular (preferably daily) basis by a consistent TA, who will follow the advice and demonstration of a programme of work, delivered by the visiting SLT or SLT assistant.
- Attend any training or mentoring sessions offered by the SALT service to enable staff to deliver speech programmes or fluency strategies in the school context
- Pre and post tutoring is used to enable the CYP to engage with learning in the classroom, including vocabulary teaching, phonics and phonological awareness. This may require additional visual support.

1C Communication and Interaction: Speech and Stammering

Level 5

The CYP has a profound speech disorder, typically Profound CYP Apraxia of Speech (CAS) which means they have very limited attempts at articulation of words, and therefore also have profound expressive language difficulties. Both their speech and language difficulties severely affect access to the curriculum. These CYPs also need to be measured on the language profiles of the SSG.

The CYP's needs are met by working on an individual, bespoke curriculum and so has a highly personalised timetable that includes time spent away from the mainstream class. The CYP is able to access the classroom for limited periods where they are able to experience success supported by a member of staff. Planned opportunities are provided for the CYP to be included with peers where the CYP is able to experience success.

Provision: Daily, specific specialised input at all times across all aspects of the curriculum		Reviews: 3 per year	Documents: Usually have an EHC Plan
Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<p>Child has many sounds missing in their speech repertoire, and they are often difficult to understand to familiar listeners. Please use Speech and Language Therapy referral form for further guidance as the severity depends on the age and stage of the child.</p> <p>A student may present with:</p> <p>Profound speech disorder, typically Profound CYP Apraxia of Speech (CAS) which may involve:</p> <ul style="list-style-type: none"> Profound difficulties in the production of speech sounds – severe motor difficulties with motor planning, programming and execution of sounds and sound combinations. <p>Continued on next page</p>	<p>Speech and Language Therapy Observations, Communication Plans and Reports.</p> <ul style="list-style-type: none"> Observation Data tracking Teacher assessments CYP Progress meetings CYP/Young Person voice One Page Profile/Learner Profile Parent/Carer voice <p>An EHCP is likely to be in place to draw together information, advice, aspirations and planned outcomes.</p> <p>Assessment tools identified, where and when they can be used to help unpick need and measure impact of support</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p>	<p>There is agreement between professionals (Educational Psychology Service, Locality SENCO, Local Authority SEND Manager etc.) that the CYP's needs and provision in place constitute a Level 5.</p> <p>Staff should have considered and implemented effective and appropriate strategies from previous levels, especially level 4. In addition, the following will be in place:</p> <p>Adjustments to Teaching Methods Staff should consider and implement as appropriate:</p> <ul style="list-style-type: none"> Advice from Speech and Language Therapy is included in the planning <p>Continued on next page</p>	<p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p> <p>Speech and Language Therapy</p> <p>Fusion SEND Hub/Learning Support</p> <p>Educational Psychology Service</p>

1C Communication and Interaction: Speech and Stammering

Level 5 continued

Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<ul style="list-style-type: none"> Extremely limited range of sounds produced spontaneously, and huge effort required to attempt a wider repertoire Difficulty imitating sounds at single sound level, in sound combinations or in words. Significant impact on prosody (intonation, fluency, volume, rate, stress, pitch) Profound difficulties with intelligibility - rarely understood without alternative communication. Hugely reliant on non-verbal alternative communication including signing, low tech communication support, visual support, for most/all needs. The CYP may need high-tech AAC equipment. Huge impact on language, especially expressive language. Standardised test scores fall below the first centile on expressive language assessment. (see level 5 on SSG language grid). Receptive language skills may also be lower than expected. <p>Continued on next page</p>		<p>Adjustments to Teaching Methods (continued)</p> <ul style="list-style-type: none"> An alternative curriculum is appropriate (due to difficulties with speech, language and possibly communication, social skills, motor or sensory needs) delivered in an adapted educational setting as recommended by appropriate specialist services. High emphasis on speech, language and communication development as directed by the SLT team. Staff will be following a programme provided by the SALT service. Adapted or bespoke curriculum Emphasis on speech, language and functional communication skills being the focus of an adapted curriculum and integrated into all learning and social opportunities. Teaching approaches that place a high emphasis on supported learning, are very finely graded and provide opportunities for frequent repetition and reinforcement <p>Continued on next page</p>

Y3 to Y6 (8-11 years)	<p>Child will be able to articulate their ideas in relation to different career and education options and will have the communication skills required to ask questions to support them in moving towards making choices.</p> <p>Child will be able to engage with career related role models/sessions on different career paths from visitors in school to further increase their understanding of potential options/areas of interest.</p>	<p>Child will have the communication and interaction skills required to enable them to ask for things that they would like, to pay for things in a shop or school lunch hall, as step toward independent living.</p> <p>Child will have the communication skills required to facilitate the development of age-related independent living skills to include cookery, travel time, money, being able to ask questions and seek support/guidance where required.</p>	<p>Child will have the communication and interaction skills required to develop and maintain friendships with peers.</p> <p>Child will be able to interact and communicate appropriately with peers to enable participation in team games, youth and after-school clubs.</p> <p>Child will have the language and communication skills required to outline any issues relating to bullying or safety online to an adult.</p>	<p>Child will have the language and communication skills required to explain the issue to an adult at times when they are hurt or feel unwell in order to access appropriate medical care as required.</p> <p>Child will have the language and communication skills required to enable them to articulate choices relating to diet and physical exercise.</p>
Provision	Please refer to detail provided within the Teaching and Learning Strategies and Curriculum/Interventions sections of the School Age Ranges Guidance: Communication and Interaction, SLCN and Autism.			

1 Communication and Interaction

PfA Outcomes and Provision continued

	PfA Outcomes			
	Employability/Education	Independence	Community Participation	Health
Y7 to Y11 (11-16 years)	<p>Child will be able to engage with structured careers advisory sessions, communicating their thoughts and ideas relating to potential career choices and having the interaction skills to talk with adults to obtain additional information/guidance as required to enable them to make informed choices.</p> <p>Child will have the communication and interaction skills (written or verbal) required to facilitate the building of a personal/vocational profile within careers sessions, moving towards building a CV for application for further education/training or employment.</p> <p>Child will have the communication and interaction skills required to function within a workplace environment, either with respect to work experience/voluntary work or part time employment to enable them to gain work related experience and explain areas of interest.</p>	<p>Child will have the communication skills required to facilitate the development of age-related independent living skills to include cookery, travel time, money, being able to ask questions and seek support/guidance where required.</p> <p>Child will have the communication and interaction skills required to enable them to socialise with peers (unsupervised) within the community and to access activities within the local community in accordance with their preferences.</p>	<p>Child will have the language, communication and interaction skills to develop and maintain friendships with peers and to integrate successfully into a range of social groupings and situations.</p> <p>Child will be able to interact appropriately via social media, online games and within the online community to maintain personal safety and lessen potential vulnerability.</p>	<p>Child will have the language and communication skills required to ask questions in order to obtain additional information relating to sex education managing more complex health needs, risks related to drugs and alcohol and support for mental health and wellbeing as required.</p> <p>Child will be able to communicate, with adult support/prompting, any health needs or concerns to a GP to obtain appropriate medical care or support as required.</p>
Provision	Please refer to detail provided within the Teaching and Learning Strategies and Curriculum/Interventions sections of the School Age Ranges Guidance: Communication and Interaction, SLCN and Autism.			

2 Cognition and Learning Levelling Grid

Levelling Grid Sheffield Support Grid: 2 Learning and Cognition – General and Specific Learning Needs						
When considering a learning difficulty, you must also consider needs in other possible co-occurring areas of the CYP/young person's profile e.g. motor, visual, hearing, language and attention.						
To identify a CYP's overall level, consider the level given in any cognitive assessments (if in place) alongside the other areas of presentation. Use a best fit judgment to derive the level of need.						
Level	Assessment data Health service diagnosis of learning disability	Attainment level	Adaptive functioning skills (Ability to manage daily living tasks and social interactions)	Areas to consider when levelling		
				Participation	Attendance	Wellbeing and emotional regulation
1 Slow Progress	Commonly a standard score of 80 to 90. No disability	As a rule of thumb this would be working at least 1 year behind expectations for attainment.	Largely age appropriate functioning	Good participation in adult directed learning activities	Good attendance (over 90%)	Good emotional regulation skills
2 Mild Learning Difficulties	Commonly a standard score of 80 or below. No disability	As a rule of thumb this would be working at least 2 years behind age related expectations for attainment, with potentially a more exaggerated gap as the CYP moves through education.	Some minor difficulties in adaptive functioning	Participates most of the time in adult directed learning activities (75% of the school week)	Attendance 75 – 90%	Some minor difficulties in emotional regulation
3 Moderate Learning Difficulties	Commonly a standard score of 69 or below (between 1st or 2nd percentile which is a 'very low' score). CYP may have a Learning Disability – consider health referral for further assessment such as a referral for a developmental review via Community Paediatricians Mild Learning Disability FSIQ <70, with associated impairment in adaptive functioning	As a rule of thumb this would be working at least 3-4 years or a key stage behind age related expectations for attainment, with a more exaggerated gap as the CYP moves through education.	Moderate impairments in adaptive functioning	Participates some of the time in adult directed learning activities (50% of the school week)	Attendance 50 – 74%	Moderate difficulties with emotional regulation

2 Cognition and Learning Levelling Grid continued

Level	Assessment data Health service diagnosis of learning disability	Attainment level	Adaptive functioning skills (Ability to manage daily living tasks and social interactions)	Areas to consider when levelling		
				Participation	Attendance	Wellbeing and emotional regulation
4 Severe Learning Difficulties (SLD)	Commonly a standard score of 60 or below (<1st percentile which is an 'extremely low' score). CYP may have a Learning Disability – consider health referral for further assessment Moderate Learning Disability FSIQ <50 , with associated significant impairment in adaptive functioning	As a rule of thumb this would be functioning below age 5 or band 5 of the Birmingham Toolkit/ or equivalent assessment tool	Significant impairment in adaptive functioning	Participates in limited adult directed learning activities (25% of the school week)	Attendance 25 – 49%	Significant difficulties with emotional regulation
5 SLD with low adaptive functioning / PMLD	Functional assessment of adaptive skills is appropriate. Severe Learning Disability FSIQ <35 with associated severe impairment in adaptive functioning	Below age 5 functioning or band 5 of the Birmingham Toolkit with additional complex needs/ or equivalent assessment	Severe impairment in adaptive functioning	Mostly does not participate in adult directed learning activities (0-10% of the school week)	Attendance below 25%	Severe difficulties with emotional regulation

Indicators of a [specific learning difficulty](#) profile:

- Adaptive functioning skills may be a strength for the young person.
- Assessment data and attainment levels are likely to be impacted
- Likely to see a spiky profile across cognitive assessments
- Progress needs to be closely monitored and measured, to be able to track impact and support the planning of specific next steps for the CYP
- If you are considering a specific learning need, there is likely to be a gap between the CYP and their peers' level of attainment despite intervention, adaptive teaching and curriculum modification.
- In Dyslexia / Dyscalculia some or all aspects of literacy / numeracy attainment are weak in relation to age, standard teaching, and instruction, and level of other attainments.

2 Cognition and Learning

Memory and Retention Ordinarily Available / Universal Support

Ordinarily available classroom provision and teaching approaches for all learners		
Positive and Effective Communication and Relationships	<ul style="list-style-type: none"> All staff have a good understanding of the impact that working memory and executive functioning skills have on the CYP's ability to learn. Staff should be mindful that the young person will find it difficult to understand links and relationships between information. Give instructions simply and clearly and make sure the student is looking at you first. Break instructions down into small chunks. Allow 1-2 minutes 'take up time' when giving instructions – this will allow the student to process fully what is required of them. Check a CYP's understanding by asking them to repeat back an instruction or explain the task to a peer. You may need to ask them to show you what they should be doing, rather than asking them to tell you. 	<ul style="list-style-type: none"> During class discussions, proactively 'retune' the student back into the lesson by interspersing more challenging questions with simple questions addressed directly to those who tend to 'drift off'. Provide repetitions – exact repetitions and rephrasing. Encourage active listening – agree a way for CYP to ask for help or clarification. Give clear guidelines and expectations: "I expect you to have produced at least three sentences by ten past ten; I will be asking you then to share these with your writing partner." Try to use strategies such as checklists, reminder notes, visual timetables etc. to support the student if they forget routines (e.g. bringing a pen and pencil, books, PE kit, arriving at the right lesson at the right time etc.)
Enabling Environment	<ul style="list-style-type: none"> Key vocab is displayed with appropriate visuals. Minimise copying from the board – provide individual copies (plan for this). Provide written, visual and video support. Use diagrams and pictures to add meaning alongside text and break long chunks of text up. 	<ul style="list-style-type: none"> To support short term memory, have small whiteboards and pens available for notes, to try out spellings, record ideas. Plan to use IT programs and apps to reinforce and revise what has been taught.
Access to Learning	<ul style="list-style-type: none"> All class work and homework should be differentiated across all subjects to enable the CYP to access the full curriculum. Plan to ensure that links to prior learning are made. Plan, teach and model techniques with the whole class to aid memory. Teach CYP strategies to support learning – e.g. asking for help, rehearsal, notetaking, place keeping, mnemonics, mind-mapping. Key learning points are reviewed at appropriate times during and at the end of a lesson or in mini plenaries. 	<ul style="list-style-type: none"> Scaffold work by providing writing frames/prompt sheets. Break tasks down into mini steps for the CYP Teach CYP how to use planners or task management boards: tasks are broken down into small manageable steps. These steps are shown explicitly. Mastery learning approaches may be helpful – a student must have mastered key concepts before moving on to the next topic.

Continued on next page

Ordinarily available classroom provision and teaching approaches for all learners		
Positive and Effective Communication and Relationships	<ul style="list-style-type: none"> Focus attention before giving instructions/information - use visual cues to guide students' attention. Check that information has been understood; observe child's responses and actions, show the child what to do rather than repeating with lots of language. Acknowledge and positively reinforce appropriate listening and attention. Simplify language, use the same language to 'cue' in pupils/students. Use CYP's names to gain attention and give feedback. Use non-verbal and verbal cue to support understanding. 	<ul style="list-style-type: none"> Lots of positive feedback and appropriate praise (or reference to a positive engagement/reward system) for good listening. Modelling good attention and listening skills through interaction and shared dialogue, Be aware if an CYP have hearing impairment and plan seating and acoustics. Reminders of the appropriate level of noise for the task. Encourage CYP to give positive feedback to others in their group as felt useful (for example 3 people in a group rating interactions). Use levels of language appropriate to the individual child.
Enabling Environment	<ul style="list-style-type: none"> Minimise distractions in the classroom – verbal and visual. Check in that pupils have understood – use a 'traffic light' or thumbs up/down system. Use visual supports to reinforce language. Have an ongoing awareness of the sensory environment and seating. Be aware if any CYP have hearing impairment and plan seating and acoustics. 	<ul style="list-style-type: none"> Make the 'environment work for the CYP' so they can see where and what is happening in different areas. CYP has access to a low distraction work area within the classroom. If additional support staff are available, enable them to move around checking that CYP are attending and able to start, continue and complete tasks. Provide timers to give a visual cue of how long a task will last. Use additional visual systems as needed.
Access to Learning	<ul style="list-style-type: none"> Ensure all staff have updated pupil profiles/passports. Break tasks into manageable chunks. Use 'task plans': a visual representation or list of verbal instructions to promote independent working. Develop sequencing skills teach of the language of sequencing. - first, next, finally etc. Have visuals to remind reinforce. Explaining to listening partners what the task is. 	<ul style="list-style-type: none"> Rating system for the CYP to indicate if they have heard and understand the task – (thumbs up/green laminated card). Use talking partners/paired and group work. Move closer to CYP as needed to support them in re-focusing to learning/tasks. Lots of positive feedback and appropriate praise (or reference to a positive engagement/ reward system) for good listening. Focusing upon effort not attainment.

Continued on next page

Ordinarily available classroom provision and teaching approaches for all learners		
Positive and Effective Communication and Relationships	<ul style="list-style-type: none"> Keep instructions to one or two parts only. Chunk sequences of instructions – i.e., deliver one at a time vocally, print them one at a time on separate cards, model in numbered steps etc. Allow 1-2 minutes 'take up time' when giving instructions – this will allow the student to process fully what is required of them. Allow time for the CYP to formulate a response and provide a choice of alternative answers if the CYP is struggling to respond. Try teaching an active listening strategy – "Stop, Look and Listen" - every time the teacher speaks. By practising responding in this way students who face Literacy difficulties may find that they recall and understand more. 	<ul style="list-style-type: none"> Repeat information/instructions if necessary and check understanding, e.g., Can the CYP tell you/show you what they have to do? Explain idioms and metaphors – don't assume pupils know what they mean (e.g., over the moon). Respond supportively when a student forgets routines – such as bringing a pen and pencil, books, PE kit, arriving at the right lesson at the right time etc. Avoid sudden changes in routine without informing them beforehand. Celebrate effort for attempting tasks as well as celebrating achievement.
Enabling Environment	<ul style="list-style-type: none"> Provide individualised resources to support learning, e.g. a bank of commonly-used words/symbols related to specific topics and signposting them to the other resources they could use. Key vocabulary is displayed with appropriate visuals. Avoid moving around too much or standing in a place with visual distractions when giving spoken instruction/information. If you frequently use your smartboard/whiteboard to present written information, remove visual distractions from around it such as shelving, posters, storage units etc. 	<ul style="list-style-type: none"> Use a pastel-coloured paper and background on your smartboard and blue, green and red pens (rather than black) on your whiteboard to reduce stark contrasts and aid visual processing. Make sure all texts are uncluttered, have a simple and a rounded font, use double line spacing and contain visuals clues that support the overall meaning. Use classroom displays to help with writing – display banks of sentence openers, connecting words, punctuation symbols etc. Build opportunities for learning breaks.
Access to Learning	<ul style="list-style-type: none"> Explicitly teach reading comprehension strategies e.g. re-reading the text, underlining key words, clarifying the meaning of words. Adults should also encourage the CYP to independently summarise what he/she has read and predict what might happen next as part of any reading intervention. 	<ul style="list-style-type: none"> Do not expect pupils to write and listen at the same time. Consider the range and level of questions which can be accessed by particular CYP and adjust accordingly. Enable pupils extra time to complete work in class and in classroom tests if needed.

Continued on next page

2 Cognition and Learning

Mathematical Difficulties Ordinarily Available / Universal Support

Ordinarily available classroom provision and teaching approaches for all learners		
Positive and Effective Communication and Relationships	<ul style="list-style-type: none"> Use specific praise when possible (e.g., you did well to remember to carry the 10) rather than vague praise (e.g., well done). Use language that supports a 'growth mindset'. For instance, 'By half-term you will be able to add and take away fractions'. Use consistent maths terminology. Use transparent language which explains what you are talking about e.g., 'three groups of four' rather than 'three times four'. 	<ul style="list-style-type: none"> Use consistent maths terminology. Use transparent language which explains what you are talking about e.g., 'three groups of four' rather than 'three times four'. Encourage CYP to ask questions. Avoid sudden changes in routine without informing them beforehand. Give an overview of the lesson at the beginning, middle and end
Enabling Environment	<ul style="list-style-type: none"> Ensure all classes (even in KS3 and 4) have practical resources which clearly demonstrate the relative value of number, e.g. Numicon, Dienes, Cuisenaire rods. Table-top resources such as 100 square, number lines, times tables. Make sure these are easily accessible. For secondary school these could be put into a planner. 	<ul style="list-style-type: none"> Visuals around class for maths language such as operators and BIDMAS. Use of games and IT to add variety to overlearning. Maths vocabulary mats. Allow brain breaks, including allowing the CYP to physically move.
Access to Learning	<ul style="list-style-type: none"> The class/subject teacher is accountable for the progress of the CYP within the mainstream class. They should know, through formative assessment and Assessment for Learning, what each pupil can and cannot do. Make clear links to previous learning. Active learning is more effective than listening. Small steps teaching based on early concepts with these being built upon through overlearning. Ensure basic concepts are secure before moving on. Overlearn and revisit the four arithmetic operations. Teach CYP to think about their own learning more explicitly, often by teaching them specific strategies for planning, monitoring, and evaluating their learning. Routine feedback. Allow CYP to evaluate their own learning and understanding. Encourage CYP to ask questions. Allow for individual thinking time and partner discussion. 	<ul style="list-style-type: none"> Start from what the child already knows (appropriate assessments undertaken to determine). Move slowly from concrete to abstract (model using resources to support thinking and reasoning). As you introduce more abstract tasks, make links to concrete resources demonstrating how you would use resources to solve the problem. Differentiated questioning and targeted simplified level/pace. Break tasks into chunks. Use task boards and task plans. Regular checking by the class teacher to ensure understanding of concepts. Relate number concepts to everyday life and specific areas of interest. Limit demands on memory (encourage CYP to work out what they need to know, using what they already know). Focus on reasoning rather than remembering. Use mnemonics, humour, drama and mechanisms to help make a memory that will stick.

2 Cognition and Learning

Level 3

The CYP's needs are met through a combination of approaches following advice from other professionals as appropriate, including small group interventions and 1:1 individualised support in and out of the classroom.			
Provision: Some targeted and individual interventions over the week		Reviews: 3 per year	Documents: Support Plan or Extended Support Plan
Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support
<p>For a general learning difficulty: Moderate difficulties that affect all areas of the curriculum and adaptive functioning skills. Persistent difficulties with the acquisition and/or use of language, literacy and numeracy despite QFT and relevant, focused small group interventions.</p> <p>May have a lack of concentration in some lessons due to comprehension and language difficulties</p> <p>Identified or suspected memory difficulties</p> <p>May display some behaviour problems and / or work avoidance.</p> <p>Possible difficulties with self esteem, motivation and emotional wellbeing despite support.</p> <p>Continued on next page</p>	<ul style="list-style-type: none"> • Observation • Data tracking • Teacher assessments • CYP Progress meetings • CYP/Young Person voice • One Page Profile/Learner Profile • Parent/Carer voice <p>An Extended Support Plan may be in place to draw together information, advice, aspirations and planned outcomes</p> <p>Screening tools and / or assessment tools as identified</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p> <p>Access arrangements considered</p>	<p>Ordinarily Available provision whilst also including:</p> <p>Adjustments to Teaching Methods Staff should consider and implement as appropriate</p> <ul style="list-style-type: none"> • Individual support working on progressive personalised targets as informed through in depth learning assessments and observations, building and developing key skills. This needs to be monitored and recorded on assessment tools that signal the next appropriate steps e.g. Locke and Beech, Birmingham Toolkit etc. • Explicit links made between interventions and group work/whole class work. School has a system in place for this. <p>Continued on next page</p>	<p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p> <p>Fusion SEND Hub/Learning Support</p> <p>Educational Psychology Service.</p> <p>Speech and Language Therapy</p> <p>Health Services if involved.</p>

2 Cognition and Learning Screening and Assessment Tools

Screening Tools

- [Dynamic assessments](#) - observable assessments to identify strengths and needs
- [Checklist for dynamic observation](#) - a tool to explore how a CYP responds to a task
- [Formative assessment for learning difficulties](#) - This tool helps you establish if there is a generalised learning difficulty.
- [Independence and Functional Skills Checklist - a checklist to determine functional](#) skill development.
- [Phonics screeners](#) (DoE) to track phonic progress
- [Birmingham Toolkit](#) - tracking tools to show levels of attainment and monitor progress
- [Dyscalculia Screener](#) - screening tool to identify dyscalculia
- [Dyslexia screener](#) - screening tool to identify dyslexia

Assessment Tools

The standardised assessments listed below are Qualification Level A, so can be administered by teachers.

- [Ravens Matrices](#) - An assessment of nonverbal reasoning, observation skills and clear-thinking ability
 - [Cognitive Abilities Tests](#) (CAT Test 4 for KS3 entry) - Measures verbal, non-verbal, quantitative and spatial reasoning
 - [Working Memory Rating Scale](#) - Working Memory Rating Scale (WMRS) helps identify children with poor working memory skills.
 - [TOMAL- 2](#) - a nationally standardised test for evaluating general and specific memory functions
 - [Dyslexia Portofolio](#) - Identifies dyslexic tendencies and recommends intervention strategies.
 - [York Assessment of Reading Comprehension](#) (YARC) A reading assessment allows you to closely observe a pupil's reading behaviours, strengths and areas for development. It breaks down the components of reading so that you can target specific skills to bring about rapid progress.
 - [Wide Range Achievement Test](#) (WRAT5) provides an accurate and easy-to-administer way to assess and monitor the reading, spelling, and maths skills, and helps identify possible learning disabilities
 - [Comprehensive Test of Phonological Processing](#) (CTOPP 2) helps evaluate phonological processing abilities as a prerequisite to reading fluency.
 - [Test of Word Reading Efficiency](#) (TOWRE2) a measure of an individual's ability to pronounce printed words and phonemically regular nonwords accurately and fluently
 - [Detailed Assessment of Speed of Handwriting](#) (DASH) - can be used to assess handwriting speed
- [Hedderley writing speed norms](#)
- [Phonological awareness](#) - an assessment and intervention pack

2 Cognition and Learning Interventions and Support

Interventions

[The school psychology service](#)

The intention of this resource is to examine the effects of targeted school-based interventions on the development of reading, spelling and writing. This 6th Edition provides information on intervention schemes for children and young people who struggle with reading, spelling, and/or writing. This resource reviews intervention schemes that have been devised to help struggling readers and writers and is intended to inform schools' and other providers' choices among such schemes. There is an obvious need for schools to have clear information in order to make principled decisions about which approach to adopt for children who experience difficulties in literacy.

2 Cognition and Learning

PfA Outcomes and provision

	PfA Outcomes			
	Employability/Education	Independence	Community Participation	Health
Reception to Y2 (5-7 years)	<p>CYP will have the listening skills and concentration to increase the amount of time they are able to maintain focus upon learning tasks</p> <p>CYP will be developing early concepts of literacy and numeracy skills to enable them to lay the foundations of later learning.</p> <p>CYP will have an awareness of 'growing up', and beginning to have some ideas of what they would 'like to be', when they are older.</p>	<p>CYP will understand the concept of time and will develop the skills necessary to access digital and analogue clocks.</p> <p>CYP will understand the concept of cooking and the contribution of ingredients to produce different foods.</p>	<p>CYP will have an understanding of the concept of friendships and will be applying this in their approach to shared play with peers.</p>	<p>CYP will understand the concept of being healthy, including the benefits of exercise and making healthy food choices and will begin to apply this in the context of mealtimes and attendance at clubs and sports activities.</p> <p>CYP will understand the need for regular dental, vision and hearing checks to maintain good health.</p>
Provision	Please refer to detail provided within the Teaching and Learning Strategies and Curriculum/Interventions sections of the Scholl Age Ranges Guidance: Cognition and Learning.			

2 Cognition and Learning

PfA Outcomes and provision continued

	PfA Outcomes			
	Employability/Education	Independence	Community Participation	Health
Y3 to Y6 (8-11 years)	<p>CYP will understand and be able to talk about different careers and education options so that they are able to make choices about what they will do next.</p> <p>CYP will begin to develop a profile of interests and aspirations in order to demonstrate individual strengths and skills.</p>	<p>CYP will understand the concept of money, demonstrating awareness that different objects are of different monetary values and beginning to use money to pay for items such as snacks in school.</p> <p>CYP will begin to understand concepts relation to travel and transport including paying for a ticket/pass, timetables, and road signs and will be aware of the role of these in facilitating independent travel.</p> <p>CYP will understand the concept of recipes relating to preparation of food and will be able to follow these with adult support to make simple foods (cupcakes, sandwiches etc.)</p>	<p>CYP will understand the importance of being safe within the local community, including online, and will begin to understand potential areas of risk, e.g. strangers, online hazards, bullying and ways to take steps to avoid these.</p> <p>CYP will be familiar with the local area, including particular places, routes of travel to enable them to begin to understand where they are going and methods to get there.</p>	<p>CYP will understand the purpose of vaccinations and will cooperate with these to ensure good medical health.</p> <p>CYP will understand changes to their body associated with puberty and will be aware of self-care routines required to maintain good physical health.</p> <p>CYP will understand minor health needs that they may have, asthma, eczema, difficulties with vision and/or hearing; they will understand the strategies and resources to manage these.</p>
Provision	Please refer to detail provided within the Teaching and Learning Strategies and Curriculum/Interventions sections of the School Age Ranges Guidance: Cognition and Learning.			

2 Cognition and Learning

PfA Outcomes and provision continued

	PfA Outcomes			
	Employability/Education	Independence	Community Participation	Health
Y7 to Y11 (11-16 years)	<p>CYP will be able to understand information relating to course options (GCSE, NVQ, Entry level qualifications, vocational options etc.) including the requirements for access to a range of HE options to enable realistic and informed choices.</p> <p>CYP will be able to think about subject option choices alongside longer term career goals and will be able to choose subjects and course options to enable next steps in their chosen direction.</p> <p>CYP will begin to think about and plan work experience/part-time opportunities to enable them to understand workplace demands and requirements and to gain early experience in areas of interest for future employment.</p> <p>CYP will continue to develop a profile of interests and achievements in order to demonstrate individual strengths and skills. This will be used in accordance with careers sessions and guidance.</p> <p>CYP will understand supported employment options e.g. Access to Work.</p>	<p>CYP will understand monetary value, how much money they have and how much money items cost, and will be able to make decisions in relation to what they spend their money on as a first step towards financial budgeting.</p> <p>CYP will demonstrate skills in accessing local transport services, buying a ticket/pass, understanding bus times, using these systems of travel to access school, for example.</p> <p>CYP will understand information relating to different food groups and meal planning and will be able to understand instructions within a recipe card/book to enable them to cook simple meals with support.</p>	<p>CYP will understand risks associated with social media, online gaming and online communities and will be increasingly competent in understanding how to keep themselves safe.</p> <p>CYP will understand social norms and conventions in relation to a variety of friendships and relationships and will be able to use this knowledge to enable them to engage appropriately within a range of social contexts.</p> <p>CYP will understand options in relation to a range of leisure and social activities available and will be able to use this to make informed and positive choices about how they want to spend their free time.</p> <p>CYP will show increased understanding of the wider picture and will build resistance to support emotional wellbeing.</p>	<p>CYP will understand information relating to sex education and sexual health in preparation for adulthood.</p> <p>CYP will understand the role of the GP and the support available to them.</p> <p>CYP will understand the risks associated with drugs and alcohol and will apply information learned to keep themselves safe.</p> <p>CYP will have a more active role in understanding and managing more complex health needs to facilitate greater independence.</p>
Provision	Please refer to detail provided within the Teaching and Learning Strategies and Curriculum/Interventions sections of the School Age Ranges Guidance: Cognition and Learning.			

All CYP will benefit from a whole school approach to emotional wellbeing to develop their emotional resilience and support their readiness to learn. Social and emotional difficulties can manifest themselves in different ways, including becoming withdrawn or isolated, as well as displaying challenging, disruptive or disturbing behaviour.

To best support the CYP's needs it is important to understand the root of the concerns shown as these behaviours may reflect underlying:

- mental health difficulties
- learning difficulties
- physical symptoms or
- be in response to more social and environmental factors.

Assessments and strategies should align with the CYP's chronological age, developmental level and emotional age.

Ordinarily Available

This is Universal Support – as part of the Graduated Response. See [assessment tools](#), [interventions and further support](#) that supports your teaching practice.

Ordinarily Available provision and teaching approaches for all learners with a recognition that some learners may require very time-limited support to secure effective application of skills and increase their engagement and access to all areas of school life. School will lead in this approach.

The table on the following pages references 4 key areas within Social, Emotional and Mental Health differences that would constitute reasonable adjustments if embedded within the classroom/school.

A Classroom Support Guide for Pupils Presenting with Social, Emotional and Mental Health Difficulties Universal Support - Classroom Strategies Good quality first teaching combined with good quality SEN Support

Positive and Effective Relationship

- Staff should all have knowledge and understanding of trauma informed practice and relational approaches, including, for example emotion coaching and restorative approaches.
- Schools should use a Low Arousal approach which seeks to understand the role of the 'situation' by identifying triggers and using low intensity strategies and solutions to avoid punitive consequences.
- Greet child or young people at the door - remind students of expected behaviours, praise those who have kept to them, and provide guidance and encouragement.
- Catch' the child or young person being good and emphasise positives in front of other children or young people and staff (where appropriate)
- Use child's or young person's name and give eye contact before giving instructions.
- Demonstrate empathy - try to show you understand the child's or young person's perspective and feelings
- Communicate in a calm, clear manner - be aware of your non-verbal communication (e.g., stance, body language awareness, facial expressions) as well as your verbal.
- Tune in to how a child might be feeling demonstrating that attunement through matching facial expression, body language non-verbal, tone of voice with child's feeling state.
- Adults to offer containment by regulating their emotions when the child or young person expresses extremes of emotion and support regulation through soothing and co- regulation.
- Introduce items of high interest to the child that incorporate shared play in a staged approach. For example, playing with the same toy alongside and progressing to playing with the same toy together in short turn taking activities.
- Incorporate games that promote eye contact or noticing the adult. For example, blowing bubbles that continue when the child looks to you.
- Use visuals safe/not safe as a consistent continuous response to dangerous actions/situations.
- Show openness in discussions about well-being and challenge negative attitudes towards well-being.
- Keep instructions, routines and rules short, precise and positive. Provide visual timetables and now/next visuals.
- Use books and stories to make feelings high profile and explore different situations that provoke different feelings for different characters. Make links between characters and ourselves and link to children's own experiences and feelings.
- Use zones of regulations with all children or young people, to support understanding and interpretation of emotions.
- Create opportunities for children and young people to work with others outside their normal friendship groups, throughout the year, using random pairs.
- Develop a collaborative relationship with the parents/carers. Communicate positive achievements – no matter how small – with home and encourage home to do the same. Could be in the form of text messages, 'good notes', postcards, merits, rewards.
- Understand that behaviour is a method of communication. What is the pupil trying to communicate? Can you identify the triggers?
- Do your best to find time for a short restorative conversation, in which you explore the incident together. Discuss who has been affected, consider the impact of the incident, and agree what to do next. For example social stories.
- Children and young people are aware of who/when/where they can share any concerns with a trusted, named adult.

3 Social, Emotional and Mental Health

Ordinarily Available continued

Enabling Environment	<ul style="list-style-type: none"> • Refer children and young people regularly to expected behaviour in setting and use consistently – ensuring that supply staff apply same consistency. • Make expectations for behaviour explicit by giving clear targets, explanations and • modelling – don't assume that child and young people should 'know' what to do • Provide visual timetables and task lists – may need to be for a short period of time • Use a visual timer to measure and extend time on task – start small and praise, praise, praise • Consider seating – children and young people seated at the back of the class may not be as tempted to turn around • Allow student to have a safe place to store belongings • Give the child or young person a classroom responsibility to raise self-esteem • Give the child or young person a classroom responsibility to raise self-esteem • Play calming music where appropriate • Create opportunities for regular revisiting and reinforcement of learning to maximise potential for the child to embed and build on that learning to be able to transfer skills. Develop a 'little and often' approach to interventions to incorporate overlearning and repetition. • Develop engagement and motivation through developing provision that matches child's interest. • Regular risk assessments in place. Use of visual prompts and consistent language throughout the setting to denote danger. • Provide children and young people with territorial space, for example, their own sleep mat, peg, locker helping them feel that they belong by having routines and rituals, for example, welcome and departure songs and greetings.
Access to Learning	<ul style="list-style-type: none"> • Give breaks between tasks and give legitimate 'moving around' activities • Legitimise movement by getting children and young people to take a message, collect an item, use a 'stress ball' or similar if necessary • Teach children and young people how to use post-it notes for questions and ideas rather than interruptions (when appropriate) • Personalise teaching where possible to reflect children and young people's interests • Allow additional processing time and time allowed to complete a task • Provide short term, adult led individual support focusing on listening, concentration, social skills • Provide preparation for any change and the need for clear routines including transition for example use of visual timetable. • Use of photographs/stories to recall events. Home/setting diary. Objects of reference linked to experiences e.g. conkers from the park. • A quiet area may be useful for child or young person to work. • A safe space for the child or young person to calm. • Provide objects of reference/ visuals/signing so child or young person can indicate needs and wants. • Use matching/sequencing games with small choice initially to help to develop categorising skills. • Use transitional objects to help children and young people to self soothe if feeling anxious. • Use visual support such as objects of reference/Visual cues/ parallel play/buddy system with adult support to help the child or young person to follow routines and structure sessions. • Offer an 'Interest box' containing objects/toys/ activities that spark child's curiosity-use as calming tool or reward for engagement. • Give a set time for written work and do not extend into breaks to 'catch up' – the child or young person will need these breaks • Transition from whole class work to independent or group work is taught, clearly signalled and actively managed

3 Social, Emotional and Mental Health

Ordinarily Available continued

Targeted Support

- Check in and out daily with an adult. This helps the pupil prepare for the day ahead. Likewise, have closure on any issues that have arisen throughout the day.
- Use the SPENCE Anxiety Scale, Boxall Profile, Self-Image Profile or Strengths, Difficulties Questionnaire (SDQ's) as a holistic approach to understanding the pupil's well-being.
- Be aware of the individual's sensitivities to some environments in times of stress e.g., overcrowding
- Short-term, goal orientated emotional literacy support, such as with an Emotional Literacy Support Assistant.
- Encourage use of worry box or worry diary (in home or school) where the child or young person writes down or draws their worries, ensuring this is followed up by any specific adult in the appropriate setting daily.
- Give children and young people the opportunity for a short-managed time out, within an agreed space in the classroom, with support of a visual timer. This will help them to begin to manage their emotions, when they start to escalate.
- Reduce demands temporarily in response to particularly challenging times in their lives
- Regular contact with home to establish patterns of behaviour in other environments as well as strategies being tried.

3 Social, Emotional and Mental Health Level 3

The CYP has social, emotional, mental health and / or behavioural needs which frequently impact on their engagement with day-to-day activities, their readiness to learn and their relationships with peers and adults. Or the CYP may show behaviours which less frequently but greatly impacts on themselves and others. Despite the challenges it is vital vulnerable CYPs feel welcomed in school, key relationships are built, and proactive support is available to help them manage their emotional regulation through a combination of whole school, class, small group and individual activities.

Provision: Some targeted and individual interventions over the week

Reviews: 3 per year

Documents: Support Plan or Extended Support Plan

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>The CYP shows Frequent/Moderate (more than once weekly) difficult behaviours such as:</p> <p>May have difficulties with social interaction- deteriorating relationships with adults and/or peers.</p> <p>May show increasingly withdrawn OR disruptive behaviour over a period or may involve a sudden change in behaviour</p> <p>Struggles to engage in some learning – struggles to emotionally regulate, showing increasingly withdrawn or disruptive behaviour.</p> <p>May show some struggles during periods of transition (e.g. meltdowns, refusal to begin or end a task, appears lost)</p> <p>Continued on next page</p>	<p>An assessment, to best understand the CYP's needs and strengths should be conducted including a formulation and intervention plan, shared with key staff, which is reviewed regularly to evaluate progress.</p> <p>Utilise the assessment toolkit to check for underlying needs such as:</p> <ul style="list-style-type: none"> • Communication difficulty • Sensory difficulty • Learning difficulty • Developmental delay or disorder • Family stresses • Specific stressor within school environment • Recent traumatic event • Historic trauma • Mental health concerns <p>Continued on next page</p>	<p>These CYPs will benefit from a trauma informed whole school approach. They need the opportunity to build trusted relationships with a small number of key staff, not an individual member of staff, and then, when possible, this should be extended.</p> <p>Staff should consider and implement as appropriate:</p> <ul style="list-style-type: none"> • Consideration of an alternative differentiated curriculum that allows flexibility to teach according to emotional needs, not chronological age, using vehicles such as IT, play, creative activities, drama. • Modifications to timetable may include, e.g. off-site activities, meet and greet, delayed start time, adjustment to access arrangements. • Person Centred Planning such as MAPS and PATHS <p>Continued on next page</p>	<p>Access to additional resources is sought from the Local Authority SEND Manager</p> <p>Early Help-Multi-agency planning processes specify contribution of individual services and lead practitioner. Inter-agency communication established and maintained</p> <p>Educational Psychology Service</p> <p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p> <p>Referral to Primary Inclusion Panel</p> <p>Referral to Secondary Inclusion Panel</p> <p>More information – under Inclusive Practice Tab</p> <p>Continued on next page</p>

		<p>Relationship (continued):</p> <ul style="list-style-type: none"> Trusted adults offer support at vulnerable times using pre-agreed strategies Increased access to individual, small group and whole class activities to promote and develop social skills, emotional regulation and self-esteem in order to address SEMH targets. (e.g. Talkabout by Alex Kelly) Access to additional circle time activities, e.g. Silver SEAL <p>Emotional Regulation:</p> <ul style="list-style-type: none"> Strategies developed alongside CYP and shared with school staff, parent/carer such as My Anxiety Plan (MAP) created alongside Educational Psychologist Sensory circuits Use of feelings diary/ logs. Therapeutic Stories e.g. Margot Sunderland books. Approaches to managing anger such as 'Starving the anger/anxiety gremlin' and 'There's a Volcano in my Tummy' Therapeutic approaches (e.g. Think Good Feel Good) Mighty Minds/FRIENDS 	

3 Social, Emotional and Mental Health

Level 4

The CYP (daily) struggles to manage their emotional regulation leading to challenging, demanding or concerning behaviour or ongoing mental health concerns. This will include access to a bespoke timetable and may include teaching in a small group for a substantial part of the day for longer than three to four terms. The CYP's needs are met using a highly personalised approach which will draw on support and advice from other professionals.			
Provision: Frequent, specific specialised input		Reviews: 3 per year	Documents: Extended Support Plan or EHC Plan
Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>CYP shows Consistent/Severe (daily) emotional distress over a sustained period of time which may be internalised or externalised and some behaviours will be clearly observable whilst others will be hidden, such as:</p> <p>May lack motivation to engage in preferred interests (and may appear withdrawn, sad or angry)</p> <p>May have thoughts of suicide or self-harm</p> <p>May shows signs of self-neglect (e.g. self-care)</p> <p>Extremes of mood and behaviour might be witnessed</p> <p>Might have strict habits or routines around food</p> <p>May have weight changes</p> <p>Continued on next page</p>	<p>Increased involvement of a range of professionals to provide assessment, formulation and intervention plans e.g. Inclusion Panel, mental health professionals, EPs</p> <p>Consider CYP's experience of Adverse Childhood Experiences alongside what protective factors the CYP has available to them</p> <p>Screening tools and / or assessment tools as identified</p> <ul style="list-style-type: none"> • Observation • Data tracking • Teacher assessments • CYP Progress meetings • CYP/Young Person voice • One Page Profile/Learner Profile • Parent/Carer voice <p>Continued on next page</p>	<p>As for Ordinarily Available and Level 3 whilst also including:</p> <p>Close liaison with parents and carers</p> <p>Staff should consider and implement as appropriate:</p> <ul style="list-style-type: none"> • Regular check in with CYP with key staff • The CYP is supported in mainstream activities that they do attend. • 1:1 / group work addresses targets as outlined on CYP's Extended Support Plan/EHCP. • Daily implementation of approaches towards meeting the individual's SEMH targets which have been identified through the use of appropriate assessment data, e.g. Motional, SCERTS, Boxall, SDQ, B2 or Locke & Beech. <p>Continued on next page</p>	<p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p> <p>Referral to Primary Inclusion Panel</p> <p>Referral to Secondary Inclusion Panel</p> <p>More information – under Inclusive Practice Tab</p> <p>Educational Psychology Service</p> <p>Mental Health Support Team</p> <p>Locality SENCo Networks</p> <p>GP</p> <p>Continued on next page</p>

3 Social, Emotional and Mental Health

Level 4 continued

Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>Young person may indicate they are feeling constantly 'on edge'</p> <p>Crisis behaviours escalate rapidly due to fluctuating triggers</p> <p>May engage in drug and alcohol misuse</p> <p>May report seeing or hearing things that other people cannot see or hear (hallucinations) and believing things that are not actually true (delusions).</p> <p>Behavioural incidents and fixed term exclusions increasing, leading to a high risk of permanent exclusion</p> <p>There might be a sustained non-engagement in school life</p> <p>Inability or complete refusal to follow school routines and instructions</p> <p>Sporadic engagement with school rewards and consequences</p> <p>May have increasing difficulties in forming positive relationships, interacting appropriately with adults and/or peers</p> <p>Continued on next page</p>	<p>An Extended Support Plan may be in place to draw together information, advice, aspirations and planned outcomes.</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p> <p>Access arrangements considered</p>	<ul style="list-style-type: none"> Off-site activities, meet and greet, delayed start time, adjustment to access arrangements Access to a completely bespoke timetable, designed to mitigate possible triggers which leads to increased success with regard to engagement, access and resilience. CYP taught for a significant amount of the time in small groups or individually outside of the mainstream curriculum and away from the mainstream class –where they are able to experience success supported by a member of staff. Planned opportunities are provided for the CYP to be included with peers where the CYP is able to experience success. The CYP has access to staff with experience and training in meeting the needs of students with SEMH, working on modified holistic curriculum tasks and key skills – including structured interventions as advised by external agencies. <p>Continued on next page</p>	<p>May have support from specialist services such as CAMHS, Social Care, Ryegate Children's Centre Community Youth Teams</p> <p>If at risk of life-threatening self-harm CYP should be seen by their GP or if urgent assessment is required, A&E</p> <p>Specialist Training: Trauma informed training</p> <p>Positive Handling Strategies – Team Teach.</p> <p>Healthy Minds training and resources</p> <p>Fusion SEND Hub/Learning Support</p>

3 Social, Emotional and Mental Health

Level 4 continued

Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>May have increasing patterns of concerning behaviours which place themselves or others at risk of serious harm, for example:</p> <ul style="list-style-type: none"> • Violence towards peers • Self-harm • Running away • Severe and sustained bullying <p>Demonstrates unsafe behaviours to self and/or others (e.g. sexualised behaviours)</p>		<ul style="list-style-type: none"> • Access to specialised SEMH provision – alternative provision, therapeutic support services, counselling etc may be considered alongside advice from other agencies/professionals 	

3 Social, Emotional and Mental Health Level 5

Severe and persistent behaviour, emotional regulation, or mental health needs (associated with level four) which means the CYP is struggling to function adequately during the school day on a lesson-by-lesson basis. Poses high risk to self and / or others. Some of this behaviour will be clearly observable and other behaviours will be more 'hidden' (e.g. they may appear withdrawn). The CYP's specified outcomes might be met within a specialist setting alongside agreement with professional outside agency advice, parents, CYP, locality SEN manager and school staff, possibly with ongoing contact from mainstream school.			
Provision: Daily, specific specialised input at all times across all aspects of the curriculum		Reviews: 3 per year	Documents: Usually have an EHC Plan
Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>CYP shows Persistent/Profound behaviours associated with Level 4 and emotional distress (more than once a day) over a sustained period of time as well as:</p> <p>Severe and persistent mental health concerns which severely impact on everyday functioning or extremely challenging, demanding or concerning behaviour / emotional regulation difficulties</p> <p>Poses high level risk to self and/or others.</p> <p>Known risk re sexual exploitation or gang affiliation.</p> <p>Behavioural incidents and fixed term exclusions have increased despite appropriate provisions made at Level 4. High risk of permanent exclusion</p> <p>Continued on next page</p>	<p>CYP's needs are either known or under active assessment.</p> <p>Agreement from Outside Agency professionals, Local Authority representatives and staff that the CYP requires access to specialist provision for SEMH/SEN.</p> <p>A range of appropriate professionals are involved.</p> <p>Will normally have an EHC Plan</p>	<p>There is agreement between professionals (Educational Psychology Service, Locality SENCO, Local Authority SEND Manager etc.) that the CYP's needs and provision in place constitute a Level 5.</p> <p>Staff should have considered and implemented effective and appropriate strategies from previous levels, especially level 4.</p> <p>In addition, the following will be in place:</p> <ul style="list-style-type: none"> • A higher staff: CYP ratio enabling access to a personalised holistic curriculum. • Specific, specialist provision to target identified SEMH and / or behaviour needs. • The CYP accesses a completely individualised curriculum <p>Continued on next page</p>	<p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p> <p>Educational Psychology Service</p> <p>May have support from specialist services such as:</p> <p>CAMHS, Social Care, Ryegate Children's Centre Community Youth Teams</p> <p>If at immediate risk of harm CYP should be seen at A&E or by a GP.</p>

3 Social, Emotional and Mental Health Level 5 continued

Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>School refusal</p> <p>Inability or complete refusal to follow school routines, instructions or access timetable</p> <p>Mainstream setting has a detrimental effect on health and well-being</p>		<ul style="list-style-type: none"> • Small group working with highly skilled staff, • Planned opportunities to access specific individual programmes of support, where the CYP's needs allow them to do so, are used to target particular outcomes. 	

3 Social, Emotional and Mental Health Screening and Assessment Tools

Screening Tools

- Make use of screening tools in other areas of needs to explore if the CYP has an unidentified need.
- [Strengths and Difficulties Questionnaire](#) - The Strengths and Difficulties Questionnaire (SDQ) is a brief behavioural screening questionnaire about 2-17 year olds.
- [Coventry Grid](#) Coventry Child and Adolescent Mental Health Services (CAMHS) has developed the Coventry Grid: ASD vs Attachment Problems to try to identify differences between the two groups and so assist in differential diagnosis.

Assessment Tools

- [ABC analysis](#) - An [ABC](#) behaviour chart is an observation tool that helps to understand the causes of [behaviour](#) which may present as challenging, by recording what happened before, during and after the behaviour. It helps [teachers](#), parents and carers to track the behaviours of children and pupils.
- [Adverse Childhood Experiences](#) - The concept of adverse childhood experiences refers to various [traumatic events or circumstances affecting children](#) before the age of 18 and causing mental or physical harm.
- A [BOXALL](#) profile is an evidence based tool supporting a whole school approach to assessing and addressing children and young people's social, emotional and behavioural development to positively impact learning, behaviour, attendance and wellbeing.
[Boxall profile at a glance](#)
- [MOTIONAL](#) Motional is a suite of evidence-based, easy-to-use tools designed to measure, positively impact, and report on emotional health
- [Measures of Children's Psychological Wellbeing](#) (seven areas Belonging, Distress, Enjoyment, Healthy Living, Resilience, Responsiveness and Social Behaviour).
<https://www.sheffieldchildrens.nhs.uk/services/camhs/healthy-minds/>
- [PIVATS](#) - The PIVATS PSED provides a structured approach to assessing, planning for a measuring small steps in progress in the areas of personal, social and emotional characteristics of their development.

3 Social, Emotional and Mental Health Interventions and Support

Interventions

- [CAMHS Healthy Minds](#) Resources and Training
- [Nurture](#) - A nurture group is a focused, short-term intervention for primary or secondary school pupils with social, emotional and behavioural difficulties which make it harder for them to learn in a mainstream class.
- [FRIENDS](#) The FRIENDS programs are a suite of Australian-developed, cognitive behaviour therapy (CBT) based programs designed to build life-long resilience in individuals, families, schools and communities.
- Restorative approaches
- [Forest Schools](#) - Forest School is a child-centred inspirational learning process, that offers opportunities for holistic growth through regular sessions.
- [Zones of Regulation](#) - A Social Emotional Learning Curriculum and Regulation Program
- [The Incredible 5 point scale](#) - Teaches social and emotional information by dividing the concept into parts for children
- [Trauma Informed Schools](#) - passionate about changing children's lives through inspirational training for schools and communities, ensuring mentally healthy cultures for all.
- Therapeutic Stories e.g. [Margot Sunderland books](#).
- Books such as '[Starving the anger/anxiety gremlin](#)' 'There's a Volcano in my Tummy' - Kate Collins Donnelly
- Mighty Minds
- [Think Good Feel Good](#) - Think Good -- Feel Good is a practical resource for undertaking CBT with children and young people.
- [Talkabout](#) - Talkabout is a complete programme for developing self-esteem, social and friendship skills. It is based on teaching children or young adults in groups in school or college but can be adapted for 1:1 sessions.
- [Emotional Based School Avoidance Guidance](#) - This document has been written for school staff and other professionals to provide information and guidance on how to support children, young people and their families experiencing Emotionally Based School Avoidance (EBSA). It also contains leaflets for children and young people (CYP) and parent carers.

3 Social, Emotional and Mental Health

PfA Outcomes and provision

	PfA Outcomes			
	Employability/Education	Independence	Community Participation	Health
Early Years (0-4 Years)	<p>CYP will have the social and emotional skills and resilience required to be able to adapt to change and new environments.</p> <p>CYP will be more able to regulate basic feelings; developing skills such as waiting to take a turn in an activity or when wanting to share news with an adult</p>	<p>CYP will develop a growing awareness of independent living skills through real-world play (kitchens, DIY, cleaning).</p> <p>CYP will be able to sit alongside peers to access meal times and snack times, developing the skills to pass out plates, cutlery and cups to their peers and to take a turn to serve themselves and others.</p>	<p>CYP will have social skills necessary to facilitate shared play and interaction with peers, developing a growing awareness of friendships to support emotional wellbeing and self-esteem.</p> <p>CYP will be able to recognise indicators of basic feelings in peers (happy and sad) and with support and modelling will respond accordingly at their developmental level (giving a hug to a peer who is crying for example)</p> <p>With prompting, CYP will begin to develop an awareness of basic social conventions in interaction with other, for example, using please and thankyou when asking for or receiving things from others</p>	<p>CYP will attend necessary dental, medical and optical checks following parental direction and supervision.</p> <p>CYP will cooperate with self-care and personal hygiene routines with prompting and adult support as required.</p> <p>CYP will show awareness of basic feelings and will have the support and strategies required to promote resilience and emotional wellbeing.</p>
	CYP will have reached expected outcomes in relation to EFYS ELG (40-60 months) upon transition from Early Years to Reception, with reference to Personal, Social and Emotional Prime Areas of learning: Making Relationships, Self Confidence and Self Awareness and Managing Feelings and Behaviour http://www.primaryresources.co.uk/foundation/docs/devmatters_tracking_2012.doc			
Provision	Please refer to detail provided within the Teaching and Learning Strategies and Curriculum/Interventions sections of the Early Years Ranges Guidance: Social, Emotional and Mental Health.			

3 Social, Emotional and Mental Health PfA Outcomes and provision continued

	PfA Outcomes			
	Employability/Education	Independence	Community Participation	Health
Reception to Y2 (5-7 years)	CYP will interact with peers and begin to form friendships to support emotional wellbeing.	<p>CYP will show awareness of independent living skills (cooking, cleaning, DIY) and will extend and develop these through real world play</p> <p>CYP will be able to access the dining hall alongside peers, following social routines in relation to seating and turn taking, and will be able to make appropriate choices in relation to meals</p>	<p>CYP will interact with peers and begin to form friendships with peers to support emotional wellbeing.</p> <p>CYP will maintain positive emotional wellbeing through participation in team games, after-school clubs and weekend activities.</p> <p>CYP will begin to identify bullying in relationships and will be able to seek adult support.</p>	<p>CYP will attend necessary dental, medical and optical checks following parental direction and supervision.</p> <p>CYP will cooperate with self-care and personal hygiene routines with prompting and adult support as required.</p> <p>CYP will have the support and strategies required to promote resilience and emotional wellbeing.</p>
Y3 to Y6 (8-11 years)	<p>CYP will interact with peers, making and maintaining friendships with others to support emotional wellbeing.</p> <p>CYP will be aware of structures in place to support social and emotional wellbeing and will access these as required.</p> <p>CYP will show awareness of different feelings and emotions and with support will identify and apply appropriate strategies to manage these.</p>	<p>CYP will be able to maintain friendships with peers and access community based clubs/after school clubs to promote independence and emotional wellbeing.</p> <p>CYP will have the social skills necessary to facilitate participation in sleepovers and residential trips.</p> <p>CYP will be able to manage their feelings and emotions, accessing support to apply strategies as appropriate.</p>	<p>CYP will maintain friendships with peers to support emotional wellbeing and avoid isolation.</p> <p>CYP will begin to identify bullying within relationships and will be able to identify support and strategies to manage this.</p> <p>CYP will be able to manage social and emotional responses to change.</p> <p>CYP will be aware of strategies and precautions to remain safe online.</p>	<p>CYP will understand physical changes associated with the onset of puberty and will manage these appropriately, with support as required, maintaining social and emotional wellbeing.</p> <p>With support, CYP will access strategies to manage any emotional or mental health needs associated with their physical or mental health conditions/diagnoses.</p>
Provision	Please refer to detail provided within the Teaching and Learning Strategies and Curriculum/Interventions sections of the Early Years Ranges Guidance: Social, Emotional and Mental Health.			

3 Social, Emotional and Mental Health PfA Outcomes and provision continued

	PfA Outcomes			
	Employability/Education	Independence	Community Participation	Health
Y7 – Y11 (11-16 years)	<p>CYP will have acquired the necessary social skills in order to interact with employers, clients and peers within the workplace within the context of work experience, voluntary work or part-time employment.</p> <p>CYP will be able to form friendships in the context of education or employment to facilitate emotional wellbeing.</p> <p>CYP should be aware of structures in place to support social and emotional wellbeing and will access these as required.</p> <p>CYP will show awareness of different feelings and emotions and, with support, will identify and apply appropriate strategies to manage these.</p>	<p>CYP will have an awareness of boundaries and social conventions with respect to different relationships and social situations, including online.</p> <p>CYP will begin to show awareness of potential abusive and exploitative behaviour in others and with support and guidance will be able to make safe choices.</p> <p>Young person will begin to make choices to include money, food, exercise, opportunities to socialise, form relationships with others, to support the development of confidence and emotional wellbeing.</p>	<p>CYP will maintain friendships with peers to support emotional wellbeing and avoid isolation.</p> <p>CYP will maintain positive emotional wellbeing through participation in community based activities and socialisation with peers within the community in accordance with their own personal choices.</p> <p>CYP will have an awareness of boundaries and social conventions within a range of relationships and social contexts, including online.</p> <p>CYP will show increased awareness of the bigger picture and will build resilience to support emotional wellbeing.</p>	<p>CYP will have an understanding of sex education and the social and emotional implications of intimate relationships.</p> <p>The CYP will have strategies and resources to support them to maintain positive mental health and emotional wellbeing.</p> <p>The CYP will understand the social and emotional implications of spending too much time on electronic devices and will recognise the importance of sleep and 'down time' in supporting social and emotional health and wellbeing.</p> <p>CYP will access strategies and support, as required, to manage any emotional or mental health needs associated with their physical or medical health conditions/diagnoses.</p>
Provision	Please refer to detail provided within the Teaching and Learning Strategies and Curriculum/Interventions sections of the Early Years Ranges Guidance: Social, Emotional and Mental Health.			

The professional judgement of a Qualified Teacher of Visual Impairment (QTVI) should be applied as necessary to decide on the classification of the visual impairment. For example, a CYP may have a mild reduction in visual acuity but be functioning within a different visual category due to an additional ophthalmic condition e.g. nystagmus, visual field reduction, cerebral visual impairment, and/or additional learning difficulties.

Ordinarily Available

This is Universal Support – as part of the Graduated Response. See [resources](#) that supports your teaching practice.

Ordinarily Available provision and teaching approaches for all learners with a recognition that learners with a mild to moderate vision impairment will require low level adjustments to secure effective visual access to their learning as advised by a Qualified Teacher of Vision Impairment (QTVI). In addition to these adjustments students will require a functional vision assessment with updated advice from the QTVI relating the child's specific eye condition at transition points. The school would be responsible for following and implement any advice given by the QTVI. The document below, references the 4 key areas of need that would constitute reasonable adjustments if embedded within a classroom/class team as part of Universal Support.

Visual acuities ranging from 6/12 – 6/24, or other visual factors such as visual field loss and cerebral vision impairment.

The table on the following pages references 4 key areas for Visual differences that would constitute reasonable adjustments if embedded within the classroom/school.

4A Sensory and Physical: Visual Impairment

Ordinarily Available continued

Ordinarily Available Strategies for Children and Young People who have a mild to moderate Visual Impairment.

Positive and Effective Relationship	<ul style="list-style-type: none"> • Use student name when directing questions. • Ensure visual information is backed up by verbal explanation. • Facilitate paired and groupwork to ensure the student can participate. • Encourage good social skills, such as making eye contact and joint visual attention. • It may be difficult for some students to find their friends in a busy environment so a buddy system or a meeting place may be helpful. • Some children may be prescribed glasses to improve their visual acuity, however this doesn't mean their vision is fully corrected. • Encourage glasses wear for near and distance tasks as advised by the QTVI. • The child may have been issued a low vision device such as a handheld magnifier – follow advice on use from QTVI and encourage use in class sensitively.
Enabling Environments (School Building)	<ul style="list-style-type: none"> • Ensure the student knows their way around key areas of school eg. Dining room, learning centre social /recreational areas. • Ensure the child is made aware about any changes to room layout. • Ensure all equipment and storage in classroom is labelled clearly. • Make the classroom environment/layout consistent. • Aim to keep walkways as clear as possible, coats hung up etc. • Displays should be bold, have good contrast and should be at eye level if possible. • Outside areas – Changes in levels, stair nosing well highlighted. • Ensure good lighting without glare, avoiding glare from windows controllable with blinds. • Signage should be clear and accessible. • For out of school activities ensure the child is named on any risk assessment taking into consideration the implications of their eye condition. • Make sure the light is good but avoid glare from windows • Aim to keep walkways as clear as possible, coats hung up etc. • A coat peg at the beginning or end of the row will help towards independence.

4A Sensory and Physical: Visual Impairment

Ordinarily Available continued

Access to Learning	<ul style="list-style-type: none"> • Make sure the light is good but avoid glare from windows. • Ensure the IWB is clean and clear of clutter. Use a black pen for teacher scribe and ensure writing is legible, printed and well spaced. • When speaking to the class or group it is best not to stand with your back to a window • Reinforce key information – breaking it down into manageable, chunks as it may take longer to read/process information. • Ensure optimum seating position is provided relative to eye condition. (As advised by QTVI) • Clear and clutter free learning resources in a minimum of font 14 preferably Arial or something similar. • Enlarging text to A3 to enable print access increases the viewing distance therefore students should fold the page and read as two A4 landscape sections). • Using a black handwriting pen or 6B pencil may be helpful for students to read back handwritten work. <ul style="list-style-type: none"> • Use of low-tech devices as advised by QTVI may be useful, these may include hand held magnifiers and sloping board. • Provide the student with their own copy of learning material. • Ensure exemplar work is accessible to the student particularly when using visualiser to display student work. • For teacher demonstrations, ensure that the student is standing close to you and can see clearly. • When using the interactive whiteboard, turn off lights to improve the contrast. • All children with a VI will experience visual fatigue, they may need extra time and short breaks to complete lesson activities. ICT: Ease of Access settings may be used if the student is struggling to access the digital screens eg. mouse pointer /icons. A child with a VI would be entitled to 25% additional time for examinations. The QTVI can provide a letter to evidence the need for this.
Communication	<ul style="list-style-type: none"> • Facial expression and body language can be difficult to interpret. Verbalise instructions and feelings clearly. • Verbalise responses from other class members to encourage participation as they may not be able to see peer interactions or responses to questioning across the classroom. • For groupwork, pair up child with positive peers to support and facilitate the child's engagement and inclusion in the activity. <ul style="list-style-type: none"> • Children can become self-conscious or socially isolated due to feelings about their sight loss. It may be useful to liaise with QTVI on opportunities available to them to meet /interact with other children and young people who have a vision impairment. • Encourage the child to self-advocate and be positive about their vision impairment. Children for example with Nystagmus could adopt an adapted head posture to maximize their vision which may make them feel self-conscious.

4A Sensory and Physical: Visual Impairment Level 3

The CYP is diagnosed as having moderate to severe vision loss (within the range of 6/24 to 6/60). The CYP may need to use assistive technology to enable access to large print and the school the curriculum. The CYP will need access to short term programmes of habilitation training where necessary to ensure age related levels of independence are maintained.

Provision: Some targeted and individual interventions over the week		Reviews: 3 per year	Documents: Support Plan or Extended Support Plan
Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies, Resources and Physical Environment	Additional advice and support
<p>Vision loss classified as moderate/severe. Visual acuities within range of 6/24 and 6/60, or other visual factors such as cerebral vision impairment or visual field loss that leads to significant loss of visual functioning. Children and Young people may have a vision condition which can fluctuate or is degenerative where regular monitoring of visual function is needed.</p>	<p>Children and Young People have been referred to Vision Support Service because they have a clinically diagnosed vision impairment.</p> <p>Once the referral is accepted the QTVI will carry out an initial assessment which will include speaking to parents, all involved with the child and a Functional Vision Assessment (FVA).</p> <p>At this point the QTVI will interpret clinical information and advises on strategies to support use of residual vision, and any compensatory strategies needed. The QTVI will then determine what level of support is needed from the Vision Support Service.</p> <p>The child or young person may also be referred to a Registered Habilitation Specialist for further assessment of mobility and independent living skills.</p>	<p>Ordinarily Available provision whilst also including:</p> <p>Adjustments to Teaching Methods Staff should consider and implement as appropriate:</p> <ul style="list-style-type: none"> • All of above but may also need assistive technology to access everyday learning tasks and or large print learning resources to enable full access to curriculum. • Differentiation may be necessary considering pace of learning and visual presentation of learning materials. • Will require regular monitoring visits from QTVI with delivery of short term intervention programmes where necessary. • Will require assessment and advice from Habilitation Specialist and may need short term programme of mobility training. <p>Continued on next page</p>	<p>Assessment of functional vision by a QTVI on at least an annual basis.</p> <p>Advice from a QTVI</p> <p>Bespoke training around individual's needs.</p> <p>Regular monitoring of curriculum access and CYP progress.</p> <p>Habilitation input as required and advised by a QTVI.</p> <p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p>

The professional judgement of a Qualified Teacher of the Deaf (QToD) should be applied to decide on the implications of a d/Deafness. For example a pupil may have a moderate to severe hearing loss but be functioning within a different hearing category due to individual communication and access needs and/or additional learning difficulties.

Ordinarily Available

This is Universal Support – as part of the Graduated Response. See [resources](#) that supports your teaching practice.

Ordinarily Available provision and teaching approaches for all learners with a recognition that some learners may require very time-limited support to secure effective application of skills and increase their engagement and access to all areas of school life. School will lead in this approach.

The table on the following pages references 4 key areas for hearing differences that would constitute reasonable adjustments if embedded within the classroom/school.

Ordinarily Available Strategies for Children and Young People who are d/Deaf	
Positive and Effective Relationship	<ul style="list-style-type: none">• Ensure that children and young people have understood information or instructions so that they can carry out a task independently.• Monitor the child’s or young person’s social development.• Model and practice ways to communicate effectively with others.• Model and practice ways to initiate conversations.• Model and practice ways to use appropriate language when interacting with different people• Put into practice any specific advice given by the specialist teacher• Consistent use of any audiological equipment provided to be monitored by school staff

Continued on next page

Enabling Environments

- Ensure the environment promotes good listening and watching conditions,
 - Ensure the pupil is seated appropriately to enable use of equipment and to access the board/ flipchart and any spoken language.
 - Choose pairs or groups carefully to ensure full participation in the activity.
 - Hearing aids do not restore typical hearing levels. It is important to remember all noise, including background noise, is amplified making communication difficult in noisy environments.
 - Learning with a Hearing loss is hard work – allow extra time and vary activities to avoid fatigue.
 - Try to keep activities short that require a lot of concentration or listening (such as stories or group work) and build in short breaks, for example, opportunities to do something active.
 - Short breaks may be needed during activities that need sustained listening and attention to avoid auditory fatigue
 - Provide a quiet, cosy corner to allow children to self-regulate and be calm. Keep resources here to encourage relaxation and rest.
 - Provide positive role models of deafness and people who wear hearing aids.
 -
 - Use resources from specialist charities-they often have lots of free helpful information and advice for professionals: National Deaf Children's Society | Supporting deaf children (ndcs.org.uk)
 - You may need to work with a range of professionals including hospital, educational specialists and charities.
 - CPD training offer taken up by school to raise awareness of different types of hearing losses and strategies to reduce barriers to learning.
- Support provided by the d/Deaf / Hearing Support Service:**
- One-off advice from specialist teacher to assess functional hearing in school setting for learners where schools have concerns
 - On-going monitoring
 - At key transition points, assessment of functional hearing completed, report/learner profile supplied with recommendations and advice given on reasonable adjustments that enables access to all curriculum areas. The learner profile will be updated at each transition point.
 - Professional judgement of QToD applied on case-by-case basis
 - CPD training offer taken up by school to raise awareness of different types of hearing losses and strategies to reduce barriers to learning.
 - Consultancy support available by contacting the Service at HearingImpairedService@sheffield.gov.uk

4B Sensory and Physical: d/Deaf Ordinarily Available continued

Access to Learning

- Consider seating position to ensure it promotes good listening and attention-at the front is usually best.
- If a child has better residual hearing in one ear then place yourself on that side.
- Give context to what you are saying by using visual aids such as pictures or models-if you can use actual objects this can be really powerful for all children and young people when demonstrating a new topic or skill.
- The noise level, acoustics and the layout of rooms are particularly important. Reducing noise levels will benefit children with glue ear or who have mild or unilateral d/Deafness as they may find it difficult to distinguish the teachers voice from background noise. Manage noise levels so they are conducive to learning and unnecessary noise is minimised :E.g. Close the window or door when there is a noise outside.
- Add rubber tips to chairs and tables.
- Replace noisy equipment.
- Avoid sitting children and young people near noisy equipment
- Use displays for language development. Displays with pictures and captions or explanations can provide important visual clues for communication.
- Make sure you have the child's or young person's attention before you start talking.
- Speak clearly and at your normal pace, avoid shouting and whispering. Don't speak too slowly or over exaggerating your mouth patterns.
- Keep your face clear and try not to cover it with your hands, hair or any objects.
- Make sure there is good lighting and that your face is not in a shadow. (don't stand with you back to a window which will shadow your face)
- Face the student when talking and allow some space between you and the child, ideally keep a distance of between 1 and 2 metres.
- When talking don't walk around the room or turn to write on the black/white board.
- Encourage others to speak one at a time and to raise their hand before speaking so that a d/Deaf child or young person is aware of who is talking.
- Use gesture and facial expressions to help children and young people understand what you are saying.
- Create visual timetables, schedules and choice boards to explain everyday routines.
- Repeat or re-phrase what you have said if a child or young person has not understood.
- Write key words, topic headings or questions on the board.
- Allow time for children and young people to look at visual clues or demonstrations before you start talking again, this will give them time to focus their attention back on you.
- Give consideration to seating arrangements and select supportive neighbours.
- Plan your sessions/lessons so that the tasks which require a lot of listening can be done when background noise is low.
- Encourage children to work quietly and reduce the level of noise in the room rather than raising your voice.
- Teaching that takes into account language delay: a targeted approach to teaching new vocabulary; breaking down information into smaller chunks; repeating and rephrasing information; checking understanding through careful questioning.
- Think about how to assess what a child has learnt and understood-you may need to use a more flexible approach.
- Keep instructions simple, avoid long and detailed explanations.
- Include tasks which require a range of responses and not just those which require a written answer.
- Always give an explanation of new vocabulary and prepare vocabulary sheets which contain words specific to the subject or topic you are teaching. If possible illustrate key words with a picture.
- Expect d/Deaf children to conform to the same standards of discipline as the rest of the children and young people.
- Literacy teaching to take into account CYP's ability to hear specific speech sounds and the need for a holistic approach to teaching reading
- Plan in pre and post learning times to prepare a child for a lesson and/or check their understanding

4B Sensory and Physical: d/Deaf Ordinarily Available continued

Communication

- Use the 5 steps outlined by the NDCS: repeat, re-phrase, explain, simplify, clarify [Resources for education professionals | Information for professionals \(ndcs.org.uk\)](https://www.ndcs.org.uk/resources-for-education-professionals/)
- Promote good communication skills within the classroom.
- Make sure that you have a child's or young person's attention before starting to talk, otherwise they may not follow the first part of the conversation or instructions.
- Gain child or young person's attention, before you expect them to listen. For example, using stories with a repeating phrase that they can join in with will help to hold attention.
- Give children and young people time to look and then listen, to help them to integrate their attention.
- When changing the topic of the conversation let the child or young person know, otherwise they may find the discussion confusing. It is useful to introduce the topic first before going into detail.
- Do not shout as this will distort your lip patterns. For children and young people who use hearing aids sudden loud noises can be painful or shocking.
- Try to keep your hands free so that you can use natural gestures to support what you are saying.
- Keep your sentences short and remember to explain any new vocabulary or technical terms.
- Check children's and young people's understanding-repeat or rephrase the question if they appear to have misunderstood.
- Pause between sentences.
- Talking about what you are doing and why
- Body language, facial expressions and gestures match the spoken word.
- Use a targeted approach to teaching new vocabulary. Repetition and reinforcement of new words. Use repetitive language linked to everyday routines.
- Encourage children and young people to tell you if they don't understand something.
- Use short sentences as these are easier to understand than either single words or long complex phrases.
- Use simple questions and open-ended questions and give simple instruction. Use a wide range of vocabulary and pin new vocabulary onto something the child or young person already knows or can see.
- Establish ground rules for how a discussion will work and ensure children and young people take it in turns to speak.
- Name the person who is talking in group discussions/class and where possible introduce the next speaker by name.
- When organising group work, plan in advance who children and young people will work with.

4B Sensory and Physical: d/Deaf Level 3

The pupil has a classified hearing level (see descriptor below). The pupil's needs are met through access to whole class learning with some modifications needed to the listening environment, classroom delivery, materials and the use of some resources as directed by the d/Deaf and Hearing Support Service.

Provision: Some targeted and individual interventions over the week		Reviews: 3 per year	Documents: Support Plan or Extended Support Plan
Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>Hearing loss is classified as moderate sensori-neural with unaided threshold 41-70 dBHL</p> <p>NATSIP Criteria score 35 - 59</p>	<p>Medical diagnosis by audiology professionals and ongoing management from clinical professionals</p> <p>Scored in accordance with NATSIP criteria by QToD</p> <p>Access arrangements considered</p> <ul style="list-style-type: none"> • Observation • Data tracking • Teacher assessments • CYP Progress meetings • CYP/Young Person voice • One Page Profile/Learner Profile • Parent/Carer voice <p>An Extended Support Plan / EHCP may be in place to draw together information, advice, aspirations and planned outcomes.</p> <p>Continued on next page</p>	<p>Ordinarily Available provision whilst also including:</p> <p>Adjustments to Teaching Methods</p> <ul style="list-style-type: none"> • Advice from QToD is implemented in the classroom • Attention will need to be paid to seating position in classroom and the listening environment – see ordinarily available document • Attention will need to be paid to use of audiological equipment. In addition to hearing aids or implants, they may require a radio aid. • Differentiation may be necessary taking into account sustained impact of hearing loss on language acquisition, pace of learning, and the requirement for visual aids <p>Continued on next page</p>	<p>d/Deaf and Hearing Support Service</p> <p>Educational Psychology Service</p> <p>Speech & Language Therapy</p> <p>Other external agencies as required</p> <p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p>

		<p>Support provided by the d/Deaf/ Hearing Support Service (continued)</p> <ul style="list-style-type: none"> • CPD training for day-to-day checking and trouble-shooting of problems with audiological equipment • CPD to encourage a sign language friendly school environment (as appropriate) • Access to a deaf peer group • QToD should be invited to all multi-professional meetings • Specific advice and guidance for transition to next stage – secondary, post 16 or post18. • Specific advice and guidance for preparation for adulthood, awareness of rights and support mechanisms for d/Deaf adults, accessing work, etc 	

Resources

[National Deaf Children's Society](#)

4C Sensory and Physical: Physical Difficulties

Ordinarily Available

This is Universal Support – as part of the Graduated Response. See [assessment tools](#), [interventions and further support](#) that supports your teaching practice.

Ordinarily Available provision and teaching approaches for all learners with a recognition that some learners may require very time-limited support to secure effective application of skills and increase their engagement and access to all areas of school life. School will lead in this approach.

The table on the following pages references 4 key areas for Visual differences that would constitute reasonable adjustments if embedded within the classroom/school.

Ordinarily Available Strategies for Children and Young People with a Physical Disability		
Positive and Effective Relationship	<ul style="list-style-type: none"> • Repetition of adult prompting and praise for young person to meet motor goals including self-care skills • Observation of young person completing motor activities including pencil grip and letter formation to identify difficulties. • Social stories if appropriate • Establish goals and use a consistent approach agreed with parents when working on independence 	
Enabling Environments	Consider the use of <ul style="list-style-type: none"> • Pencil grips (similar support can be gained through using blue tac/elastic band for older children) • Easi-grip scissors • Sloped work surface • Movin’ sit cushion • Laptop/tablet for recording work with software installed such as Clicker for primary/ DocsPlus for secondary 	<ul style="list-style-type: none"> • Allowing additional time and support to get changed for P.E. • Reminders and support at lunch times if needed for eating/ cutlery skills • Reminders and some support if appropriate for self-care such as toileting

Level 3

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>Cerebral Palsy GMFCS level 2</p> <ul style="list-style-type: none"> Can climb stairs with a railing Has difficulty with uneven surfaces inclines or in crowds Has only minimal ability to run or jump <p>Cerebral Palsy GMFCS level 3</p> <ul style="list-style-type: none"> Walks with assistive mobility devices indoors and outdoors on level surfaces May be able to climb stairs using a railing May propel a manual wheelchair and need assistance for long distances or uneven surfaces <p>NB: where there is good parent/carer support, minimal disruption, easy access environment, experienced staff etc. If a CYP needs adaptations to the environment e.g. lift, move to level 4.</p> <p>Cerebral Palsy MACS level 3</p> <ul style="list-style-type: none"> Handles objects with difficulty; needs help to prepare and/or modify activities. <p>Continued on next page</p>	<p>Screening tools and / or assessment tools as identified</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p> <p>Access arrangements considered</p>	<p>Resources</p> <ul style="list-style-type: none"> Equipment to support CYP e.g. pencil grips, easi-grip scissors, laptop / tablet, sloped work surface, cushion for seat, foot box, adapted class chair etc. Follow handwriting advice for schools year 5 and below Follow handwriting advice for schools year 6 and secondary Refer to the 'Menu of Technology' to make decisions around the use of Assistive Technology Refer to training Sway to make decisions around using assistive technology. SENCOs need to have an awareness of the possible future needs of CYP diagnosed with Duchene Muscular Dystrophy/progressive/deteriorating conditions and make early considerations and preparations to ensure the CYP is able to access the resources and finances needed, and the school is adapted to meet need. 	

4C Sensory and Physical: Physical Difficulties

Level 3

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>Cerebral Palsy MACS level 3 (continued)</p> <ul style="list-style-type: none">• The performance is slow and achieved with limited success regarding quality and quantity. Activities are performed independently if set up or adapted. <p>Severe Developmental Coordination Disorder (DCD) or motor coordination difficulties.</p> <ul style="list-style-type: none">• Movement ABC-2 score <5th percentile• Significant difference between measured level of intelligence and motor performance.			

4C Sensory and Physical: Physical Difficulties

Level 4

The CYP has a severe motor impairment and uses a wheelchair some/all of the time. They need adult help to change their position, e.g. wheelchair to class chair, wheelchair to toilet, to stand and turn, or may need to use a hoist. The CYP will have involvement of Physiotherapy or Occupational Teams (or both) which may be intermittent episodes of care. Their needs are met through a highly personalised timetable in school using specialist equipment and training, planned in conjunction with appropriate Outside Agency Practitioners.			
Provision: Frequent, specific specialised input		Reviews: 3 per year	Documents: Extended Support Plan or EHC Plan
Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>NB. GMFCS Level 4</p> <p>Cerebral Palsy GMFCS level III</p> <ul style="list-style-type: none"> • Walks with assistive mobility devices indoors and outdoors on level surfaces • May be able to climb stairs using a railing • May propel a manual wheelchair and need assistance for long distances or uneven surfaces <p>NB: Level 4 in the GRID where there are significant changes for the young person e.g. periods of rapid growth, surgery, transition, family events. The education environment is more complex and requires adaptations. The CYP has significant potential to improve / deteriorate without adult intervention.</p> <p>Continued on next page</p>	<p>Physiotherapist / Occupational Therapist and other involved professional reports and assessments</p> <ul style="list-style-type: none"> • Observation • Data tracking • Teacher assessments • CYP Progress meetings • CYP/Young Person voice • One Page Profile/Learner Profile • Parent/Carer voice <p>An Extended Support Plan / EHCP may be in place to draw together information, advice, aspirations and planned outcomes.</p> <p>Assessment tools as identified to unpick need and measure impact of support</p> <p>Continued on next page</p>	<p>Adjustments to Teaching Methods</p> <p>Staff should consider and implement as appropriate</p> <p>Grouping</p> <ul style="list-style-type: none"> • Daily individual support to work on modified curriculum. • Therapy programmes as advised by PT/OT <p>Physical Environment</p> <ul style="list-style-type: none"> • Adaptations to physical environment as advised by OT <p>Resources</p> <ul style="list-style-type: none"> • Specialist seating • Aids and Equipment e.g. laptop/tablet/alternative recording device, specialist cutlery, changing plinth, manual handling aids <p>Continued on next page</p>	<p>Assessment from Physiotherapist or Occupational Therapist with report or advice and possibly an episode of care or ongoing support offered.</p> <p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p> <p>Educational Psychology Service</p>

4C Sensory and Physical: Physical Difficulties

Level 4

Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>Cerebral Palsy GMFCS level IV</p> <ul style="list-style-type: none"> Walking ability severely limited even with assistive devices Uses wheelchairs most of the time and may propel own power wheelchair Standing transfers, with or without assistance <p>Cerebral Palsy MACS level IV</p> <ul style="list-style-type: none"> Handles a limited selection of easily managed objects in adapted situations. Performs parts of activities with effort and with limited success. Requires continuous support and assistance and/or adapted equipment, for even partial achievement of the activity. Young person with Duchene Muscular Dystrophy who can no longer walk, but has some upper limb function. 	<p>Multi agency planning, Outside Agency advice and recommendations are followed</p> <p>Access arrangements considered</p>	<p>Mobility</p> <ul style="list-style-type: none"> Uses a wheelchair some/all of the time to move around school. Adult help to change position, and/or from one piece of equipment to another. E.g. when toileting, transitioning from specialist seating to wheelchair <p>PE</p> <ul style="list-style-type: none"> Needs adult support to access PE and a differentiated programme. <p>Seating</p> <ul style="list-style-type: none"> May need a specialist school chair (in addition to wheelchair). <p>Splints</p> <ul style="list-style-type: none"> May wear splints on leg(s) or arm/hand or both <p>Functional Skills</p> <ul style="list-style-type: none"> Needs adult help with tasks such as dressing, feeding, toileting due to motor impairment <p>Recording</p> <ul style="list-style-type: none"> May need to use assistive technology e.g. laptop, tablet, eye gaze, switches 	

4C Sensory and Physical: Physical Difficulties

Level 5

<p>The CYP has multiple, complex physical difficulties which affect their whole body. The CYP is dependent on a wheelchair and requires a hoist to move. They require multiple pieces of personal equipment, e.g. moulded seat, assistive technology and wheelchair. They have Physiotherapy / Occupational Team involvement, which may be in episodes of care. Their needs are met through a highly specialised provision and timetable in a specialist setting.</p>			
Provision: Daily, specific specialised input at all times across all aspects of the curriculum		Reviews: 3 per year	Documents: Usually have an EHC Plan
Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>Cerebral Palsy GMFCS level V</p> <ul style="list-style-type: none"> Has physical impairments that restrict voluntary control of movement Ability to maintain head and neck position against gravity restricted Impaired in all areas of motor function Cannot sit or stand independently, even with adaptive equipment Cannot independently walk but may be able to use powered mobility <p>MACS level V</p> <ul style="list-style-type: none"> Does not handle objects and has severely limited ability to perform even simple actions Requires total assistance 	<p>Physiotherapist / Occupational Therapist and other involved professional reports and assessments</p> <ul style="list-style-type: none"> Observation Data tracking Teacher assessments CYP Progress meetings CYP/Young Person voice One Page Profile/Learner Profile Parent/Carer voice <p>An EHCP is likely to be in place to draw together information, advice, aspirations and planned outcomes.</p> <p><u>Assessment tools as identified</u>, where and when they can be used to help unpick need and measure impact of support</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p>	<p>There is agreement between professionals (Educational Psychology Service, Locality SENCO, Local Authority SEND Manager etc.) that the CYP's needs and provision in place constitute a Level 5.</p> <p>Staff should have considered and implemented effective and appropriate strategies from previous levels, especially level 4. Level 5

Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
		<p>Seating</p> <ul style="list-style-type: none">• May need a specialist school chair (in addition to wheelchair) <p>Splints</p> <ul style="list-style-type: none">• May wear splints on leg(s) or arm/hand or both <p>Functional Skills</p> <ul style="list-style-type: none">• Dependent on an adult for all tasks such as dressing, feeding, toileting due to motor impairment <p>Recording</p> <ul style="list-style-type: none">• May be able to use high-tech assistive technology for recording work	

4C Sensory and Physical: Physical Difficulties

Screening and Assessment Tools

Screening Tools

- [MOVES](#) - The MOVES programme has a screening tool to identify motor difficulties and leads to an easily delivered intervention and support programme for children who present with coordination, motor and organisational difficulties (This has been created by Soth Warwickshire NHS Trust)

which_programme_fin
e_motor_skills_checkli:

- [Gross and fine motor screener -](#) Screening tool to help identify if a child has a motor need
- MATCH flyers [Recognising Motor Difficulties](#) - provides prompts to consider if a CYP has a motor difficulty and ideas for support

Assessment Tools

- [DASH](#) - The Detailed Assessment of Speed of Handwriting (DASH) can be used to assess handwriting speed - ideal for providing evidence for Access Arrangements for Key Stage 2 National Curriculum Tests and for General Qualifications

4C Sensory and Physical: Physical Difficulties

Interventions and Support

Interventions

- Ideas and support for [life skills advice for younger children](#)
- [MOVES](#) - The MOVES programme has a screening tool to identify motor difficulties and leads to an easily delivered intervention and support programme for children who present with coordination, motor and organisational difficulties (this has been created by Soth Warwickshire NHS Trust)
- [Lincolnshire 1st Move checklist and interventions](#) - 1st Move is a resource intended for use both by parents/carers and in nursery/schools by teachers and support staff. It is written to be a 'child friendly' approach focussing on skill development. 1st Move emphasises functional skill development
- Follow [handwriting advice for schools year 5 and below](#)
- Follow [handwriting advice for schools year 6 and secondary](#)
- The National Handwriting Association have lots of information and resources both for [teachers](#) and [parents](#)

Further Support

- [Refer to the Motor Skills Clinic via the GP](#) for children who have difficulties with their motor skills or suspected DCD, but no physical disability.
- [Seek information from the mainstream therapy team](#) for children with a known physical disability when you need physiotherapy or occupational therapy support.
- Seek information from the [physiotherapy and occupational therapy teams](#) for an overview of services.
- Seek support from the [Sensory Service](#): For children experiencing difficulties with sensory processing.
- Seek support from the [Musculoskeletal Physiotherapy Outpatients Team](#): For any problems relating to recent injuries and pain.
- Seek support from the [Rheumatology Team](#): For concerns regarding hypermobility and joint pain.
- Refer to the [Menu of Technology](#) for different AT options
- Refer to training [Sway](#) when considering the use laptops/ipad/tablets
- Contact the [Crick](#) team to discuss Clicker and DocsPlus software
- [Strategies to help with Organisation](#) gives advice for CYP to organise themselves, their thoughts, and their equipment.
- [Higher level strategies to support planning and organisation skills](#) - is for young people with communication difficulties that have difficulty planning and organising on a day to day basis.
- Be aware and make arrangements for CYP with physical difficulties for [Fire Evacuations](#)
- Further resources can be found in the [Sheffield Children's NHS Resource Library](#)
- Adaptations for Young People with Physical Disabilities in Sheffield Mainstream Schools

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support

Content in development. Information will be added in a future version.			
Provision: Frequent, specific specialised input		Reviews: 3 per year	Documents: Extended Support Plan or EHC Plan
Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support

Content in development. Information will be added in a future version.			
Provision: Daily, specific specialised input at all times across all aspects of the curriculum		Reviews: 3 per year	Documents: Usually have an EHC Plan
Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support

At all levels, consider where the sensory needs maybe coming from e.g. an autism profile, an unmet communication need, a trauma response etc. to help guide us if there may be other areas of the young person’s profile that would benefit from support.

Ordinarily Available

This is Universal Support – as part of the Graduated Response. See [assessment tools and interventions](#) that supports your teaching practice.

Ordinarily Available provision and teaching approaches for all learners with a recognition that some learners may require very time-limited support to secure effective application of skills and increase their engagement and access to all areas of school life. School will lead in this approach.

The table on the following pages references 4 key areas for sensory differences that would constitute reasonable adjustments if embedded within the classroom/school.

Ordinarily Available Strategies for Children and Young People with Sensory Needs	
Positive and Effective Relationship	<ul style="list-style-type: none">Capture Pupil Voice: Talking Mats is visual, differentiated way of capturing Pupil Voice.Support in unstructured times, pre-empting sensory needs and making adaptations as appropriate.Develop self-awareness so young people can recognise their sensory triggers and make adaptations as appropriate.Agree a signal that the young person can use to indicate if they are becoming overwhelmed in class and what the response to this signal will be.Social Stories may be used to help young people cope with change/new experiences if appropriate.

Continued on next page

4E Sensory and Physical: Sensory needs Ordinarily Available continued

Enabling Environments	<ul style="list-style-type: none"> • Ensure the young person is drinking, eating and toileting regularly – consider making a chart if needed. • The classroom is organised to emphasise open space. • Pupil is supported to organise their belongings and sit at a low stimulus table/workstation. • The white board and surfaces are free of visual clutter – for 1m the circumference. • Use of noise cancelling headphones available • Reasonable adjustments made for uniform where needed. • Weighted items (e.g. blanket) and tactile objects available where appropriate • Transition times are managed effectively, so that noise levels are not excessive, and the young person knows what to expect. This could mean pupil leaving 5 mins earlier to and from lessons. • Offer a range of sensory equipment e.g. wobble cushion, stress ball, chewlerry and fiddle toys – agree with the young person what resources support them. 	<ul style="list-style-type: none"> • Whole class and school sensory profile completed and adaptations made where needed • Consider individual sensory profile • All staff to adopt a Low Arousal Approach Sheffield City Council\Desktop\Low arousal classroom environment approaches.docx • Use movement breaks at the first signs of stress, where appropriate and possible. Offer physical activity to allow them to expel energy/stress and gain proprioceptive feedback. For some young people this could be delivering a note, carrying some books etc. • Ensure pupil can access a 'Regulating Space' in school – free to access when in crisis. Practice moving to this room if appropriate and possible, when pupil is in a Low Arousal state. • Ensure young people with sensory issues can access a toilet other than the pupil toilets e.g. disabled toilet, staff toilet. • Offer the young person access to a peg/coat hook at the end of a line or a space separate from the others if needed. • Low Arousal Approach: Studio3 has free webinars and support
Access to Learning	<ul style="list-style-type: none"> • Consistency of approach amongst staff – all staff will be aware of the young person's sensory needs and reasonable adjustments and adaptations needed • Environmental considerations are made to meet the known needs the pupil e.g. seating position, noise, personal space and classroom layouts, displays and signage. Staff may have recognised needs through the use of sensory checklists, staff observations or outside agency input 	<ul style="list-style-type: none"> • Make use of sensory breaks where needed • Utilise sensory circuits and physical activity to enable the young person to start noticing bodily sensations and linking these to emotions. This can then link into emotional support such as Zones of Regulation or the 5-point scale.
Communication	<ul style="list-style-type: none"> • Ensure there is a familiar, emotionally available adult to 'check-in'. • Make use of one-page profiles/ pupil passport that clearly captures the young person's voice on the approaches they find helpful and those they find unhelpful. Ensure these are reviewed regularly. 	<ul style="list-style-type: none"> • Introduce a home-school communication book in place where appropriate.

4E Sensory and Physical: Sensory needs

Level 3

At all levels, consider where the sensory needs maybe coming from e.g. an autism profile, an unmet communication need, a trauma response etc. to help guide us if there may be other areas of the young person's profile that would benefit from support.			
Provision: Some targeted and individual interventions over the week		Reviews: 3 per year	Documents: Support Plan or Extended Support Plan
Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
Will experience moderate sensory needs that have an impact on everyday life, e.g. avoidance of environment or activity, some distress or inability to attend and focus	<p>AET Sensory Checklist</p> <ul style="list-style-type: none"> • Observation • Data tracking • Teacher assessments • CYP Progress meetings • CYP/Young Person voice • One Page Profile/Learner Profile • Parent/Carer voice <p>An Extended Support Plan / EHC plan may be in place to draw together information, advice, aspirations and planned outcomes</p> <p>Screening tools and / or assessment tools as identified</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p> <p>Access arrangements considered</p>	<p>Sensory supports/Movement breaks are planned into the timetable frequently, this could take the form of completing class jobs, taking a note, collecting the milk etc.</p> <ul style="list-style-type: none"> • A personalised sensory plan - Identifying individual sensory needs and steps taken to support. • Sensory Circuits are offered as a daily part of the timetable (these can be completed by the young person independently depending on age/stage of development). • Spaces created inside and outside that cater for specific sensory needs for a young person, if appropriate. • May require support with transitions and change even with forewarning. <p>Continued on next page</p>	<p>Understanding Your Child's Sensory Signals – Angie Voss</p> <p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p>

4E Sensory and Physical: Sensory needs

Level 3

Bespoke Descriptor Level 3	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
		<ul style="list-style-type: none"> • May require sensory adaptations in the learning space such as consideration to where they sit, fiddle toys, regular movement breaks. • Physical sensory consideration such as alterations to the uniform, seating plan and sensory support tools may be appropriate. <p>Make use of Sheffield CYP's Sensory Service - Sensory Processing support videos and resources</p> <p>Universal Provision offer from the Sensory Service: -This is the first level of provision for all families. Our Virtual Therapy service provides information about sensory processing and how to understand your CYP's sensory needs, and provides strategies that may help you and your CYP. (There is the option to access this information via a group workshop for families who are unable to access digital resources). See the link above for the Virtual Therapy service.</p>	

4E Sensory and Physical: Sensory needs

Level 4

At all levels, consider where the sensory needs maybe coming from e.g. an autism profile, an unmet communication need, a trauma response etc. to help guide us if there may be other areas of the young person's profile that would benefit from support.

Provision: Frequent, specific specialised input		Reviews: 3 per year	Documents: Extended Support Plan or EHC Plan
Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
<p>May be overloaded by external environmental stimuli.</p> <p>Sensory differences will be present to an extent that they have a great impact on daily life, e.g. sensory avoidance/seeking within environmental settings and visible distress and/or avoidance.</p>	<p>AET Sensory Checklist</p> <ul style="list-style-type: none"> • Observation • Data tracking • Teacher assessments • CYP Progress meetings • CYP/Young Person voice • One Page Profile/Learner Profile • Parent/Carer voice <p>An Extended Support Plan / EHC plan may be in place to draw together information, advice, aspirations and planned outcomes</p> <p>Screening tools and / or assessment tools as identified</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p> <p>Access arrangements considered</p>	<ul style="list-style-type: none"> • A personalised sensory plan - Identifying individual sensory needs and steps taken to support. • Physical sensory consideration such as alterations to the uniform, seating plan and sensory support tools may be appropriate. <p>Make use of Sheffield CYP's Sensory Service - Sensory Processing support videos and resources</p> <p>Targeted Provision offer from the Sensory Service: If you have specific question(s) about your CYP's sensory needs that aren't covered in the Universal Provision Virtual Therapy package, you will have the option to contact our team to request further support.</p> <p>Continued on next page</p>	<p>May make use of Locality Panels – Stage 1 or 2 (if Applicable)</p>

4E Sensory and Physical: Sensory needs

Level 4

Bespoke Descriptor Level 4	Identification and Assessment	Teaching and Learning Strategies and Interventions	Additional advice and support
		<p>We will then liaise with you either via email or telephone to discuss your questions and to provide advice.</p> <p>You can expect us to provide training resources for school staff about how to understand the sensory needs of CYP and help to make the school environment sensory accessible.</p>	

4E Sensory and Physical: Sensory needs Level 5

At all levels, consider where the sensory needs maybe coming from e.g. an autism profile, an unmet communication need, a trauma response etc. to help guide us if there may be other areas of the young person's profile that would benefit from support.			
Provision: Daily, specific specialised input at all times across all aspects of the curriculum		Reviews: 3 per year	Documents: Usually have an EHC Plan
Bespoke Descriptor Level 5	Identification and Assessment	Teaching and Learning Strategies	Additional advice and support is available from:
Will experience severe sensory needs that have a very significant impact on everyday life, e.g. avoidance of environment or activity , significant distress or inability to attend and focus	<p>AET Sensory Checklist</p> <ul style="list-style-type: none"> • Observation • Data tracking • Teacher assessments • CYP Progress meetings • CYP/Young Person voice • One Page Profile/Learner Profile • Parent/Carer voice <p>An EHC is likely to be in place to draw together information, advice, aspirations and planned outcomes</p> <p>Assessment tools identified, where and when they can be used to help unpick need and measure impact of support</p> <p>Multi agency planning, Outside Agency advice and recommendations are followed</p> <p>Access arrangements considered</p>	<p>There is agreement between professionals (Educational Psychology Service, Locality SENCO, Local Authority SEND Manager etc.) that the CYP's needs and provision in place constitute a Level 5.</p> <p>Staff should have considered and implemented effective and appropriate strategies from previous levels, especially level 4.</p> <p>In addition, the following will be in place:</p> <ul style="list-style-type: none"> • A personalised sensory plan - Identifying individual sensory needs and steps taken to support. • Physical sensory consideration such as alterations to the uniform, seating plan and sensory support tools may be appropriate. <p>Continued on next page</p>	May make use of Locality Panels – Stage 1 or 2 (if Applicable)
